BAB V

PENUTUP

5.1. Kesimpulan

Penelitian ini bertujuan untuk mengetahui apakah terdapat perbedaan kinerja keuangan dan kinerja saham perusahaan sebelum dan sesudah SEO. Perusahaan yang dipilih sebagai sampel penelitian adalah semua perusahaan yang melakukan SEO pada tahun 2007-2012 sehingga didapati sebanyak 30 perusahaan yang diteliti. Berdasarkan hasil pengujian dan analisis statistik deskriptif maka dapat diambil beberapa kesimpulan sebagai berikut :

1. Terdapat perbedaan pada rasio keuangan CR sebelum dan sesudah SEO pada pengujian (t_{-1} dan t_0), (t_{-2avg} dan t_0), dan (t_{-2avg} dan t_{+2avg}) yaitu peningkatan kinerja keuangan CR yang artinya adalah perusahaan mampu meningkatkan pengelolaan aset lancar dan mengendalikan liabilitas lancar dalam periode penelitian SEO.

2. Terdapat perbedaan pada rasio keuangan ROA sebelum dan sesudah SEO pada pengujian (t_{-1} dan t_0), (t_{-2avg} dan t_0), dan (t_{-2avg} & t_{+2avg}) yaitu peningkatan kinerja keuangan ROA yang artinya adalah perusahaan mampu meningkatkan pengelolaan aset untuk digunakan sebagai alat penghasil laba setelah pelaksaan SEO.

3. Tidak terdapat perbedaan pada rasio keuangan TAT dan DER. TAT yang cenderung tidak berubah diduga karena kemampuan perusahaan untuk

mengelola aset dalam tujuan untuk meningkatkan penjualan bersih (*sales*) stagnan tiap tahunnya selama periode penelitian SEO, sedangkan DER yang cenderung tidak berubah diduga karena kepercayaan kreditor untuk mendanai kegiatan operasional perusahaan relatif stabil dari tahun-tahun sebelum SEO dan tahun-tahun setelah SEO.

4. Terdapat perbedaan pada rasio NPM pada pengujian (t_{-2avg} & t_{+2avg}) yaitu peningkatan kinerja keuangan NPM. Menurut Wild dan Subramanyam (2009), NPM yang membaik mengindikasikan bahwa perusahaan mampu melakukan kontrol biaya dan beban. Dengan demikian dapat disimpulkan bahwa peningkatan NPM mengindikasikan perusahaan dapat mengontrol beban-beban dan biaya-biaya setelah pelaksanaan SEO.

5. Terdapat perbedaan pada rasio PBV pada pengujian (t_0 dan t_{+1}), (t_{-2avg} dan t_0), (t_0 dan t_{+2avg}) yaitu peningkatan kinerja menjelang SEO, memuncak pada saat SEO, dan menurun pasca SEO. Dapat disimpulkan bahwa pelaksanaan SEO belum dapat meningkatkan kepercayaan investor untuk melakukan investasi.

6. Terdapat perbedaan pada kinerja saham perusahaan pada pengujian 1 tahun sebelum dan sesudah SEO, serta pengujian 1 hari sebelum dan sesudah SEO yaitu peningkatan kinerja saham. Dalam penelitian terdahulu *return* saham tidak mengalami perbedaan kinerja bahkan *return* saham mengalami penurunan. Dapat disimpulkan bahwa pengumuman SEO melalui *additional listing without right* lebih menarik jika dibandingkan dengan *right issue.*

5.2. Implikasi Manajerial

Keputusan pendanaan adalah salah satu hal penting yang harus dipertimbangkan dalam pengambilan keputusan. Keputusan pendanaan melalui SEO dengan cara *additional listing without right issue* dianggap lebih menarik bagi investor jika dibandingkan dengan cara *right issue* sehingga jika perusahaan ingin menerbitkan saham baru sebaiknya menerbitkan saham dengan cara *additional listing without right issue.*

5.3. Catatan Penelitian

Sampel penelitian yang dipakai dalam penelitian ini adalah sampel perusahaan yang melakukan SEO dengan cara *additional listing without right issue* sehingga penelitian ini belum dapat membuktikan secara pengujian statistik bahwa pelaksanaan SEO dengan cara *right issue* kurang menarik bagi investor jika dibandingkan dengan SEO dengan cara *additional listing without right.* Menarik atau tidak pelaksanaan SEO hanya dilihat dari hasil penelitian terdahulu yang meneliti tentang *right issue*.

Penelitian ini menggunakan rasio ROA sebelum pajak, yang seharusnya adalah ROA setelah pajak yaitu hasil perhitungan dari laba operasi setelah pajak dibagi dengan total aset. Pemilihan sampel perusahaan dianggap kurang banyak sehingga pada saat pengujian terhadap *return* saham didapati banyak saham perusahaan yang "tertidur" yang artinya harga saham perusahaan stagnan atau tidak terjadi transaksi jual beli saham.

5.4. Saran

Berdasarkan pada hasil analisis data, kesimpulan, dan catatan penelitian yang ada, maka dapat diajukan saran sebagai berikut:

a. Bagi peneliti yang akan datang, disarankan untuk melakukan beberapa kemajuan. Pertama, melakukan penelitian tentang SEO dengan kedua cara yaitu *additional listing without right issue* dan *right issue*, sehingga dapat membuktikan secara statistik mana yang lebih menarik. Kedua, menggunakan ROA setelah pajak karena penelitian ini belum menggunakan ROA setelah pajak. Ketiga, penelitian yang akan datang lebih teliti dalam memilih sampel artinya tidak hanya melihat ketersediaan data melalui rasio keuangan melainkan melihat juga ketersediaan data melalui *return* saham.

b. Bagi investor, disarankan untuk dapat mempertimbangkan keputusan melakukan investasi saham atau tidak melakukan investasi saham, karena hasil penelitian ini menyatakan bahwa terdapat peningkatan kinerja saham 1 tahun sebelum dan 1 tahun sesudah SEO serta terdapat peningkatan kinerja saham 1 hari sebelum SEO dan 1 hari sesudah SEO.

c. Bagi perusahaan, disarankan untuk melakukan aktivitas pendanaan melalui SEO dengan cara *additional listing without right issue*, karena dalam penelitian sebelumnya perusahaan tidak mengalami perubahan kinerja keuangan dan kinerja saham, bahkan ada penelitian yang mengatakan bahwa kinerja keuangan dan kinerja saham mengalami penurunan jika melakukan SEO dengan cara *right issue*.
