

## BAB VI

### KESIMPULAN DAN SARAN

Bab ini berisi kesimpulan yang didapatkan penulis setelah melakukan penelitian perancangan aplikasi *mobile* konseling perkawinan pada Gereja katolik di daerah Banteng Yogyakarta. Di dalam bab ini penulis terbuka terhadap saran dari para pembaca dan peneliti di bidang aplikasi *mobile*. Keterbatasan dalam perancangan dari aplikasi *mobile* konseling ini kiranya dapat menjadi bahan masukan bagi pengembangan dan penelitian selanjutnya.

#### 6.1 Kesimpulan

Dari proses penelitian yang dilakukan penulis mulai dari identifikasi kebutuhan sampai dengan implementasi terdapat beberapa hal yang dapat penulis jadikan kesimpulan.

1. Merancang sebuah aplikasi *mobile* konseling harus memperhatikan kebutuhan informasi dan kebutuhan fungsionalitas sistem. Hal ini akan menjadi dasar untuk merancang antarmuka dan fitur di dalam sistem.
2. Metode *wireframe* yang difokuskan untuk desain fisik antarmuka dapat digabungkan dengan metode UCD proses yang berfokus pada desain sistem non fisik. Metode *wireframe* memiliki performa yang baik untuk merepresentasikan kebutuhan informasi dan kebutuhan fungsionalitas. Dengan demikian diperoleh desain antarmuka yang mudah digunakan (*user friendly*).

3. Sistem aplikasi *mobile* konseling perkawinan ini dapat membantu dan memperlancar komunikasi antara pengguna aplikasi dengan konselor. Aplikasi ini menjadi sistem yang sesuai dengan tujuan perancangannya dan memenuhi kebutuhan peserta kursus persiapan perkawinan dalam melakukan konseling melalui perangkat *mobile device* yang terhubung dengan internet.

## **6.2 Saran**

Saran yang dapat penulis sampaikan untuk penelitian selanjutnya yang sejenis adalah pengembangan dan penyempurnaan aplikasi *mobile* konseling ini dengan menambahkan fungsionalitas yang dapat memberikan nilai tambah. Dengan demikian pengembangan aplikasi *mobile* dalam bidang konseling maupun bidang yang lain ke depannya akan menunjang kelancaran pelayanan dalam Gereja katolik bagi umat.
