DECLARATION

This is to clarify to the best of my knowledge that this thesis entitled “MOBILE LEARNING “IMBUHAN” GRAMMAR INDONESIAN LANGUAGE FOR CAMBODIAN STUDENTS” is the result of my own research work and it has not been previously submitted to any higher educational establishment in order to obtain any degree. All the views and opinions expressed therein remain the sole responsibility of mine and do not necessarily represent those of University of Atma Jaya Yogyakarta (UAJY), other researchers and organizations mentioned in this report.

Yogyakarta, March 2017

Va Seangly
ACKNOWLEDGEMENT

Several acknowledgements are given as following to the people involved:
First of all, I would like to pay my high gratitude and respect to my main advisor, Prof. Ir. Suyoto, M.Sc., Ph.D., for his guidance both on conceptual and technical and encouragement throughout the study and thesis research. As well I thank and respect to Dr. Ir. Alb. Joko Santoso, M. T., my co-advisor, for his guidance and good support.

Secondly, I would like to express my gratefulness to DIKTI/KNB program from Indonesian Government for their financially support for my living in Indonesia as well as for the grant of scholarship.

Thirdly, I also wish to show my high appreciation all my friends and classmates in Department of Information Technology, Faculty of Industrial Technology, University of Atma Jaya Yogyakarta (UAJY), for their assistance during doing my final research.

Finally, I would like to express my highest gratitude to my parents and family for their unlimited supports, advices, encouragements, endorsements and believes.
ABSTRACT

M-learning (mobile learning) is an approach learning involving device move where learner can access matter, directions and application pertaining to lessons for no limited in time and space, wherever and whenever they are. With all cultures and economic growth who occupies 16 the word economic powers, many strangers come in Indonesia to visiting sights, work or learned. By studying Indonesian language strangers be able to communicate more easily in the community. But 81 Cambodian students in the university of ATMAJYA YOGYAKARTA, GADJAH MADA, UNY University and the State University YOGYAKARTA or other Universities have difficulty understanding grammar Imbuhan in learning process Indonesian language. Application mobile learning grammar Imbuhan Indonesian language based android is option to overcome problem. Application mobile learning this developed by the use of programming language java, Android Studio tools, and accessible by using a Smartphone Android. This application consisting of a lesson about Imbuhan a prefix (ber, men, ter, pen), a suffix (an), konfiks (men-kan, men-i, ke-an, per/pen(an)) and training quiz. Application tested with 81 Cambodian students, the results of testing show the effectiveness of the application and application well received by 79 Cambodian students.

Keywords: mobile learning, Imbuhan (affixes), smartphone android

LIST OF FIGURES..................................................................................xi
LIST OF TABLES.....................................................................................xiii
CHAPTER I INTRODUCTION.................................................................1
  1.1. Background ..................................................................................1
  1.2. Problem Statement.......................................................................4
  1.3. Research Limitation.....................................................................4
  1.4. Originality of the Research.........................................................5
  1.5. Benefit of the Research...............................................................5
  1.6. Purpose of the Research.............................................................5
  1.7. Systematic Writing.......................................................................5
    1.7.1 Chapter 1: Introduction.........................................................6
    1.7.2 Chapter 2: Literature Review.................................................6
    1.7.3 Chapter 3: Research Methodology........................................6
    1.7.4 Chapter 4: The Results of Research and Discussion.............6
    1.7.5 Conclusion and Suggestions for Future Work......................7

CHAPTER II LITERATURE REVIEW....................................................8
  2.1. Literature Review.........................................................................8
  2.2. Theoretical Background...........................................................15
2.2.1. Understanding imbuhan affix .......................................................... 15
2.2.2. Prefix .............................................................................................. 16
2.2.3. Suffix .............................................................................................. 17
2.2.4. Infix ............................................................................................... 17
2.2.5. Prefix and a suffix (konfiks / konfix) .............................................. 17
2.2.6. Android .......................................................................................... 18
2.2.7. SQLite .............................................................................................. 19

CHAPTER III RESEARCH METHODOLOGY ................................................. 21
3.1. Material Research.............................................................................. 21
   3.1.1. The tool of Research ................................................................... 21
      3.1.1.1. Laptop ..................................................................................... 21
      3.1.1.2. Mobile Android Device ......................................................... 21
      3.1.1.3. Software .................................................................................. 22
   3.1.2. Research Step .............................................................................. 22
      3.1.2.1. Literature study ...................................................................... 22
      3.1.2.2. The initiation of study ............................................................. 22
      3.1.2.3. Interview ............................................................................... 22
      3.1.2.4. Method of development software ......................................... 23
   3.1.3. Mind Map ..................................................................................... 24
   3.1.4. Flow Chart ................................................................................... 24

CHAPTER IV THE RESULTS OF RESEARCH AND DISCUSSION .................. 26
4.1 A Description of Products ................................................................... 26
   4.1.1 Perspective Products .................................................................... 26
   4.1.2 Use Case Diagram ........................................................................ 27
   4.1.3 Characteristic of Users .................................................................. 28
4.2 Special Needs ....................................................................................... 28
   4.2.1. Needs External Interface ............................................................. 28
4.2.1.1 User Interface ................................................. 29
4.2.1.2 Interface Hardware ............................................ 29
4.2.1.3 Interface Software .............................................. 29
