## **ABSTRACT**

Stocks are one of the instrument aspect in the capital market. It can be categorized as Value and Glamor Stock. The differences between the two have many varieties in the analyzing of the performances. There were so many research in the past to analyze these two categories and have differences result based on the purpose. This research aims to determine whether the Value stock portfolio perform better result than the Glamor stock portfolio and also to analyze the risk adjusted performance between Value stock portfolio and Glamor stock portfolio.

The sample of this study using the stock listed in KOMPAS100 in the period of 2012-2016. The formation of the portfolio was taken by the theory of consistent earner strategy by analyzing the Price to Earnings Ratios, Dividend Yield, and Return On Equity on each stock category. Thus developing the portfolio Value and Glamor stock. The calculation of return using the closing price each stock, risk by using the Sharpe ratio, and ANOVA analyze to validate the data and the adjusted risk and return.

The result of this study showed that the Value stock outperform the Glamor stock in term of return and adjusted risk performance in period of 2012-2016 for the stock that listed in KOMPAS100.

## **INTISARI**

Saham adalah salah satu instrument perdagangan di pasar modal. Ini bisa dikategorikan sebagai saham *Value* dan saham *Glamor*. Perbedaan keduanya terdapat banyak macam pada analisis performa saham. Ada banyak penelitian terdahulu untuk menganalisis kedua kategori ini dan terdapat banyak hasil berdasarkan tujuannya. Penelitian ini bertujuan untuk menentukan apakah *portfolio* saham *Value* menghasilkan hasil yang lebih baik daripada saham *Glamor* dan juga untuk menganalisis *risk adjusted performance* antara *portfolio* saham *Value* dan saham *Glamor*.

Sampel pada penelitian ini menggunakan saham yang terdapat pada KOMPAS100 periode tahun 2012-2016. Pembentukan *portfolio* diambil dari teori *consistent earner strategy* dengan menganalisis *Price to Earnings Ratios*, *Dividend Yield*, dan *Return On Equity* pada setiap kategori saham. Kemudian membentuk kategori saham *Value* dan *Glamor*. Perhitungan *return* menggunakan harga penutupan, resiko menggunakan *Sharpe ratio*, dan analisis ANOVA untuk validasi data.

Hasil penelitian ini menunjukkan bahwa saham *Value* lebih tinggi daripada saham *Glamor* pada *return* dan *adjusted risk performance* di periode tahun 2012-2016 untuk saham terdaftar di KOMPAS100.

**Kata kunci:** saham *Value*, saham *Glamor*, *Return*, *Risk adjusted performance*, *Portfolio*
