TABLE OF CONTENTS

PART 1

CASO₄ SCALE FORMATION ON VIBRATED PIPING SYSTEM IN THE PRESENCE CITRIC ACID	1
<i>Mangestiyono W., Jamari J., Muryanto S., Bayuseno A. P.</i>	
UTILIZATION OF INDONESIA'S HOT SPRING SOURCES FOR ELECTRICITY USING KALINA CYCLE AND ORGANIC RANKINE CYCLE	7
<i>Prabumukti Grano, Wahyu Purwanto Widodo</i>	
MANAGING CAMPUS ENERGY: COMPROMISING BETWEEN RAPID NEEDS AND ENVIRONMENTAL REQUIREMENT	15
<i>Ambariyanto Ambariyanto, Utama Yos J., Purwanto</i>	
DEVELOPING ENERGY TECHNOLOGY COURSE FOR UNDERGRADUATE ENGINEERING MANAGEMENT STUDY PROGRAM IN LAKE TOBA AREA WITH PARTICULAR FOCUS TO SUSTAINABLE ENERGY SYSTEMS IN DEVELOPMENT CONTEXT	19
<i>Manik Yosef, Sinaga Rizal, Saragi Hadi</i>	
AN EFFECT OF HUMID CLIMATE ON MICRO STRUCTURE AND CHEMICAL COMPONENT OF NATURAL COMPOSITE (BOEHMERIA NIVEA-ALBIZIA FALCATA) BASED WIND TURBINE BLADE	24
<i>Sударsono S., Purwanto P., Sudarsono Johnny W</i>	
THE EFFECT OF ACID PRE-TREATMENT USING ACETIC ACID AND NITRIC ACID IN THE PRODUCTION OF BIOGAS FROM RICE HUSK DURING SOLID STATE ANAEROBIC DIGESTION (SS-AD)	28
<i>Dwi Nugraha Winardi, Syafrudin, Fadhila Keumala Cut, Hawali Abdul Matin Hashfi, Budiyo</i>	
USING A FUZZY LIGHT SENSOR TO IMPROVE THE EFFICIENCY OF SOLAR PANELS	33
<i>Suryono Suryono, Endro Suseno Jatmiko, Khuriati Riza Sulistiati Ainie, Prahara Tahan</i>	
THE INCREASE OF ENERGY CONSUMPTION AND CARBON DIOXIDE (CO₂) EMISSION IN INDONESIA	38
<i>Sasana Hadi, Eka Putri Annisa</i>	
CFD ANALYSIS TO CALCULATE THE OPTIMAL AIR VELOCITY IN DRYING GREEN TEA PROCESS USING FLUIDIZED BED DRYER	43
<i>Yohana Eflita, Prasetya Nugraha Afif, Eva Diana Ade, Mahawan Ilham, Nugroho Sri</i>	
A CASE STUDY: THE POTENTIAL OF ENERGY EFFICIENCY IN SENIOR HIGH SCHOOL OF SEMARANG REGENCY, CENTRAL JAVA, INDONESIA	48
<i>Yustika Ana, Purwanto P, Hermawan H</i>	
COMPRESSED NATURAL GAS TECHNOLOGY FOR ALTERNATIVE FUEL POWER PLANTS	54
<i>Pujotomo Isworo</i>	
IMPACT OF TRAINING AND MENTORING ACTIVITIES WHICH ARE GIVEN TO THE LEVEL OF INTEREST AND CAPABILITY INDUSTRIAL TARGET GROUP IN ADOPTING SNI ISO 50001	58
<i>Apriyanti Dwi, Ika Nugrahanto Aris, Shrestha Sanjaya</i>	
PERFORMANCE ANALYSIS OF ISOLATED HYBRID POWER PLANT MODEL WITH DYNAMIC LOAD CONDITIONS – MORNING, NOON AND AFTERNOON TRANSITIONS	62
<i>Irawati Rina</i>	
ENHANCEMENT OF BIOGAS PRODUCTION FROM RICE HUSK BY NAOH AND ENZYME PRETREATMENT	70
<i>Syafrudin, Dwi Nugraha Winardi, Sarima Agnesia Shandy, Hawali Abdul Matin Hashfi, Budiyo</i>	
GEOMAGNETIC SURVEY TO EXPLORE HIGH-TEMPERATURE GEOTHERMAL SYSTEM IN BLAWAN-IJEN, EAST JAVA, INDONESIA	76
<i>Daud Yunus, Rosid Syamsu, Fahmi Fikri, Maulana Yunus Faris, Muflihendri Reza</i>	
GEOTHERMAL POTENTIAL BASED ON PHYSICAL CHARACTERISTICS OF THE REGION (CASE STUDY: MOUNT KARANG, PANDEGLANG REGENCY AND BANTEN PROVINCE)	80
<i>Russel Phillip, Damayanti Astrid, Giok Pin Tjong</i>	
SEA WATER CHARACTERIZATION AT UJUNG KULON COASTAL DEPTH AS RAW WATER SOURCE FOR DESALINATION AND POTENTIAL ENERGY	86
<i>Mugisidi Dan, Heriyani Okatrina</i>	
HOME PHOTOVOLTAIC SYSTEM DESIGN IN PANGKALPINANG CITY	90
<i>Sunanda Wahri</i>	

BIOGAS PRODUCTION FROM RICE HUSK WASTE BY USING SOLID STATE ANAEROBIC DIGESTION (SSAD) METHOD.....	95
<i>Hawali Abdul Matin Hashfi, Hadiyanto</i>	
THE EFFECT OF COD CONCENTRATION CONTAINING LEAVES LITTER, CANTEEN AND COMPOSITE WASTE TO THE PERFORMANCE OF SOLID PHASE MICROBIAL FUEL CELL (SMFC)	102
<i>Samudro Ganjar, Syafrudin, Dwi Nugraha Winardi, Sutrisno Endro, Bagus Priyambada Ika, Muthi'Ah Hilma, Natalia Sinaga Glory, Tubagus Hakiem Rahmat</i>	
ROLES OF K₂O ON THE CAO-ZNO CATALYST AND ITS INFLUENCE ON CATALYST BASICITY FOR BIODIESEL PRODUCTION.....	107
<i>Buchori Luqman, Istadi I., Purwanto P., Marpaung Louis Claudia, Safitri Rahmatika Luthfiani</i>	
POTENTIAL OF ELECTRIC POWER PRODUCTION FROM MICROBIAL FUEL CELL (MFC) IN EVAPOTRANSPIRATION REACTOR FOR LEACHATE TREATMENT USING ALOCASIA MACRORRHIZA PLANT AND ELEUSINE INDICA GRASS	111
<i>Zaman Badrus, Wisnu Wardhana Irawan</i>	
TECHNICAL ANALYSIS FEASIBILITY STUDY ON SMART MICROGRID SYSTEM IN SEKOLAH TINGGI TEKNIK PLN	115
<i>Suyanto Heri</i>	
SOLAR WATER HEATING SYSTEM FOR BIODIESEL PRODUCTION.....	119
<i>Syaifurrahman, Usman A Gani, Rinjani Rakasiwi</i>	
PRELIMINARY STUDY ON THE LOCATION SELECTION OF MICROALGAE CULTIVATION IN NUSA TENGGARA REGION AS A POTENTIAL FEEDSTOCK FOR BIOAVTUR.....	123
<i>Permata Kusuma Anggraini Rr. Citra, Adi Sasongko Nugroho, Dwi Kuntjoro Yanif</i>	
ENHANCING BIODIESEL FROM KEMIRI SUNAN OIL MANUFACTURING USING ULTRASONICS	128
<i>Supriyadi Slamet, Purwanto Purwanto, Dwi Anggoro Didi, Hermawan</i>	
BIOENERGY POTENTIAL BASED ON VINASSE FROM ETHANOL INDUSTRIAL WASTE TO GREEN ENERGY SUSTAINABILITY	133
<i>Harihastuti Nani, Marlana Bekti</i>	
OPTIMIZATION OF METHANE GAS FORMATION RATE WITH THE ADDITION OF EM4 STARTER-MADE FROM TOFU LIQUID WASTE AND HUSK RICE WASTE USING BIOGAS REACTOR-FIXED DOME IN LANGENSARI WEST UNGARAN.....	136
<i>Arifan Fahmi, Muhammad Fuad, Winarni Sri, Rama Devara Hafizh, Hanum Latifah</i>	
A STUDY OF SEDIMENTATION AT THE RIVER ESTUARY ON THE CHANGE OF RESERVOIR STORAGE	139
<i>Iskahar, Suripin, Isdiyana</i>	
OZONE APPLICATION FOR TOFU WASTE WATER TREATMENT AND ITS UTILISATION FOR GROWTH MEDIUM OF MICROALGAE SPIRULINA SP.....	146
<i>Hadiyanto Hadiyanto</i>	
EFFECT OF LIGHT INTENSITY AND PHOTOPERIOD ON GROWTH OF CHLORELLA PYRENOIDOSA AND CO₂ BIOFIXATION	150
<i>Johar Gunawan Teuku, Ikhwan Yusni, Restuhadi Fajar, Pato Usman</i>	
POLLUTION IMPACT AND ALTERNATIVE TREATMENT FOR PRODUCED WATER.....	157
<i>Hedar Yusran, Budiyo</i>	
INTEGRATING ELECTROKINETIC AND BIOREMEDIATION PROCESS FOR TREATING OIL CONTAMINATED LOW PERMEABILITY SOIL.....	169
<i>Surya Ramadan Bimastyaji, Jatnika Effendi Agus, Helmy Qomarudin</i>	
NUMERICAL SOLUTION OF A 3-D ADVECTION-DISPERSION MODEL FOR DISSOLVED OXYGEN DISTRIBUTION IN FACULTATIVE PONDS.....	175
<i>Sunarsih, Sasongko Dwi P., Sutrisno</i>	
EFFECTIVENESS OF NITRIFICATION INHIBITION ON VARIOUS SPECIES OF BRACHIARIA GRASS RHIZOSPHERE	179
<i>Purwanto, Supriyadi, Hindrayani Aniek</i>	
PERFORMANCE OF ANAEROBIC BAFFLED REACTOR WITH THREE COMPARTMENTS IN REMOVAL OF COD OF WASTEWATER OF CHILLY SAUCE	184
<i>Sumantri Indro, Budiyo B., Purwanto P.</i>	
HEAVY METAL CONTENT IN TERRACED RICE FIELDS AT SRUWEN TENGARAN SEMARANG - INDONESIA	188
<i>Hindarwati Yulis, Retnaningsih Soeprubowati Tri, Sudarno</i>	
INTEGRATION OF CLEANER PRODUCTION AND WASTE WATER TREATMENT ON TOFU SMALL INDUSTRY FOR BIOGAS PRODUCTION USING ANSBR REACTOR	194
<i>Setyowati Rahayu Suparni, Budiyo Budiyo, Purwanto Purwanto</i>	

PREPARATION AND CHARACTERIZATION OF NIMO/AL₂O₃ CATALYST FOR HYDROCRACKING PROCESSING.....	198
<i>Widiyadi Aditya, Adil Guspiani Gema, Riady Jeffry, Andreanto Rikky, Dea Chaiunnisa Safina, Widayat Widayat</i>	
OPTIMIZATION OF CHITOSAN DRYING TEMPERATURE ON THE QUALITY AND QUANTITY OF EDIBLE FILM.....	202
<i>Sri Wahyuni Endah, Arifan Fahmi</i>	
POTENTIAL APPLICATION OF BIODRYING TO TREAT SOLID WASTE	207
<i>Zaman Badrus, Oktiawan Wiharyanto, Hadiwidodo Mochtar, Sutrisno Endro, Purwono, Wisnu Wardana Irawan</i>	
OIL PALM EMPTY FRUIT BUNCHES (OPEFB): EXISTING UTILIZATION AND CURRENT TRENDS BIO REFINERY IN INDONESIA	210
<i>Rame</i>	
BIODEGRADATION OF COD IN HOUSEHOLD WASTEWATER WITH AEROBIC BIOFILM TECHNOLOGY BY ADDING SEDIMENT DRAINAGE SEWERAGE	215
<i>Sumiyati Sri, Purwanto P., Sutrisno Endro, Sudarno S., Arthawidya Jalu, Izzudin Humam</i>	
DECREASING OF BOD CONCENTRATION ON ARTIFICIAL DOMESTIC WASTEWATER USING ANAEROB BIOFILTER REACTOR TECHNOLOGY	218
<i>Sumiyati Sri, Purwanto P., Sudarno S.</i>	
OPTIMIZATION OF WASTEWATER OF BATIK BUARAN PEKALONGAN BY USING PHOTOCATALYTIC MEMBRANE BIOREACTOR.....	221
<i>Arifan Fahmi, Nugraheni Fs, Elsa Lianandaya Niken</i>	
DOSE OF BIOCOAGULANT-MIXING RATE COMBINATIONS FOR OPTIMUM REDUCTION OF COD IN WASTEWATER	224
<i>Faustina Patricia Maria, Purwono, Arief Budihardjo Mochamad</i>	
APPLICATION OF PESTICIDE PHYTOREMEDIATION IN IRRIGATED RICE FIELDS SYSTEM USING ECENG GONDOK (EICHHORNIA CRASSIPES) PLANTS.....	228
<i>Kartika Febriani Ika, Hadiyanto</i>	
ANALYSIS OF HEAVY METAL CONTENT (PB) ON WATERS AND FISH AT THE FLOATING CAGES BPPP AMBON	232
<i>Wattimena Rachel L., Selanno Debby A. J., Tuhumury Samuel F., Tuahatu Juliana W.</i>	
THE BENEFIT IMPACT OF AIR POLLUTION REDUCTION THROUGH ATCS IMPLEMENTATION AT INTERSECTIONS	238
<i>Arief Budihardjo Mochamad, Setiyo Huboyo Haryono, Prasetyo Samadikun Budi</i>	
ACID RAIN CONTRIBUTION FROM PESTICIDE DISTRIBUTION TO RICE FARMERS IN PATI REGENCY.....	241
<i>Qosim Ahmad, Anies, Rya Sunoko Henna</i>	
MODELING NITROGEN DECREASE IN WATER LETTUCE PONDS FROM WASTE STABILIZATION PONDS	245
<i>Agnes Putri Gitta, Sunarsih</i>	
FLASH TECHNOLOGY: FULL-SCALE HOSPITAL WASTE WATER TREATMENTS ADOPTED IN ACEH	250
<i>Rame, Tridecima Adeodata, Pranoto Hadi, Moesliem, Miftahuddin</i>	
TIDAL INFLUENCE ON WATER QUALITY OF KAPUAS KECIL RIVER DOWNSTREAM	255
<i>Purnaini Rizki, Sudarmadji, Purwono Suryo</i>	
STRATEGY OF WATER POLLUTION CONTROL BASE ON SOCIAL ECONOMIC ACTIVITY, IN KARANG MUMUS RIVER, SAMARINDA EAST KALIMANTAN, INDONESIA	260
<i>Pramaningsih Vita, Suprayogi Slamet, Purnama Setyawan</i>	
PRELIMINARY DESIGN OF INDUSTRIAL SYMBIOSIS OF SMES USING MATERIAL FLOW COST ACCOUNTING (MFCA) METHOD	264
<i>Siwi Dwi Astuti Rahayu, Dwi Astuti Arieayanti, Hadiyanto</i>	
CULTIVATION OF MICROALGAE CHLORELLA SP ON FRESH WATER AND WASTE WATER OF TOFU INDUSTRY	271
<i>Widayat, Philia John, Wibisono Jessica</i>	
EFFECT OF BATIK WASTE WATER ON KALI WANGAN WATER QUALITY IN DIFFERENT SEASONS.....	274
<i>Lestari S., Sudarmadji, Tandjung S. D., Santoso S. J.</i>	
APPLICATION OF LIFE CYCLE ASSESSMENT (LCA) IN SUGAR INDUSTRIES	278
<i>Dwi Astuti Arieayanti, Siwi Dwi Astuti Rahayu, Hadiyanto Hadiyanto</i>	
DISTRIBUTION OF HEAVY METALS (CU AND FE) IN SEA WATER OF GRESIK COASTAL AREA.....	283
<i>Nindyapuspa Ayu, Chusnun Ni'Am Achmad</i>	

THE ACOUSTICAL PROPERTIES OF THE POLYURETHANE CONCRETE MADE OF OYSTER SHELL WASTE COMPARING OTHER CONCRETES AS ARCHITECTURAL DESIGN COMPONENTS.....	286
<i>Setyowati Erni, Hardiman Gagoek, Purwanto</i>	
UTILIZATION OF NATURAL ZEOLITE FROM PONOROGO AND PURWOREJO FOR NAPHTHOL SUBSTANCE ADSORPTION	291
<i>Imandiani Sundus, Indira Christine, Johan Anthony, Budiyo</i>	
SUSTAINABLE DEVELOPMENT STRATEGY OF DOMESTIC WASTE INFRASTRUCTURE IN THE CITY OF SURAKARTA	295
<i>Rezagama Arya, Purwono, Damayanti Verika</i>	
WASTE BANK REVITALIZATION IN PALABUHANRATU WEST JAVA.....	301
<i>Prasetyo Samadikun Budi, Siwi Handayani Dwi, Permana Laksana Muhamad</i>	
EFFECTIVENESS OF REDUCING P FERTILIZER AND ADDING FISH POND MUD WASTE ON GROWTH AND YIELD OF SOYBEAN IN PEATLAND.....	307
<i>Riak Asie Erina, Rumbang Nyahu, Winarti Sih, Sinaga Soaloon</i>	
PRELIMINARY EVALUATION OF METHOD TO MONITOR LANDFILLS RESILIENCE AGAINST METHANE EMISSION.....	312
<i>Amalia Chusna Noor, Maryono Maryono</i>	
THE REMOVAL OF TURBIDITY AND TSS OF THE DOMESTIC WASTEWATER BY COAGULATION-FLOCCULATION PROCESS INVOLVING OYSTER MUSHROOM AS BIOCOAGULANT	317
<i>Pardede Astrid, Arief Budihardjo Mochamad, Purwono</i>	
MATHEMATICAL ANALYSIS FOR THE OPTIMIZATION OF WASTEWATER TREATMENT SYSTEMS IN FACULTATIVE POND INDICATOR ORGANIC MATTER.....	321
<i>Sunarsih, Widowati, Kartono, Sutrisno</i>	
FACULTATIVE STABILIZATION POND: MEASURING BIOLOGICAL OXYGEN DEMAND USING MATHEMATICAL APPROACHES	324
<i>Wira S Ihsan, Sunarsih Sunarsih</i>	
POTENTIAL OF MICROALGAE CHLORELLA VULGARIS AS BIOREMEDIATION AGENTS OF HEAVY METAL PB (LEAD) ON CULTURE MEDIA	328
<i>Rita Sulistya Dewi Endah, Nuravivah Riza</i>	
GOOD HOUSEKEEPING IMPLEMENTATION FOR IMPROVING EFFICIENCY IN CASSAVA STARCH INDUSTRY (CASE STUDY : MARGOYOSO DISTRICT, PATI REGENCY)	332
<i>Setyo Aji Wijayanto, P Purwanto, S Suherman</i>	
USE OF A GERMINATION BIOASSAY TO TEST COMPOST MATURITY IN TEKELAN VILLAGE.....	336
<i>Oktiawan Wiharyanto, Zaman Badrus, Purwono</i>	
A REVIEW ON LANDFILL MANAGEMENT IN THE UTILIZATION OF PLASTIC WASTE AS AN ALTERNATIVE FUEL.....	339
<i>Hidayah Nurul, Syafrudin</i>	
THE EFFECTIVITY OF GREEN COCONUT WATER TO REDUCE MERCURY LEVEL IN THE BLOOD AND TO IMPROVE BLOOD PROFILES AND LIVER CELLS APPEARANCE (STUDY IN SPRAGUE DAWLEY RATS)	345
<i>Ehmeeda M Abdurzag, Nur Kristina Tri, Suwondo Ari, Rya Sunoko Henna</i>	
PREVALENCE OF HOOKWORM INFECTION AND STRONGYLOIDIASIS IN CATS AND POTENTIAL RISK FACTOR OF HUMAN DISEASES	353
<i>Sedionoto Blego, Anamnart Witthaya</i>	
MAPPING OF LEPTOSPIROSIS ENVIRONMENTAL RISK FACTORS AND DETERMINING THE LEVEL OF LEPTOSPIROSIS VULNERABLE ZONE IN DEMAK DISTRICT USING REMOTE SENSING IMAGE	358
<i>Rahayu Siti, Sakundarno Adi Mateus, Dian Saraswati Lintang</i>	
PLANKTON AND HEAVY METAL CORRELATION FROM COMMERCIAL VESSELS IN PORT OF TANJUNG EMAS SEMARANG	367
<i>Tjahjono Agus, Nur Bambang Aziz, Anggoro Sutrisno</i>	
PHYSICOCHEMICAL CHARACTERISTICS OF ARTIFICIAL RICE FROM COMPOSITE FLOUR: MODIFIED CASSAVA STARCH, CANAVALLA ENSIFORMIS AND DIOSCOREA ESCULENTA.....	375
<i>Sumardiono Siswo, Pudjihastuti Isti, Abyor Handayani Noer, Kusumayanti Heny</i>	
THE EFFECT OF CLOUD EAR FUNGUS (AURICULARIA POLYTRICHA) ON SERUM TOTAL CHOLESTEROL, LDL AND HDL LEVELS ON WISTAR RATS INDUCED BY REUSED COOKING OIL	379
<i>Budinastiti Ratih, Rya Sunoko Henna, Suci Widiastiti Nyoman</i>	

WORK ENVIRONMENT FACTORS AND THEIR INFLUENCE ON URINARY CHROMIUM LEVELS IN INFORMAL ELECTROPLATING WORKERS	384
<i>Setyaningsih Yuliani, Husodo Adi Heru, Astuti Indwiani</i>	
THE PRESENCE OF RAT AND HOUSE SANITATION ASSOCIATED WITH LEPTOSPIRA SP. BACTERIAL INFECTION IN RATS (A CROSS SECTIONAL STUDY IN SEMARANG, CENTRAL JAVA PROVINCE, INDONESIA)	388
<i>Setiyani Endang, Martini Martini, Dian Saraswati Lintang</i>	
ANALYSIS OF WORK DESIGN IN RUBBER PROCESSING PLANT.....	392
<i>Wahyuni Dini, Nasution Harmein, Budiman Irwan, Wijaya Khairini</i>	
IDENTIFICATION OF SOIL PROPERTIES AND ORGANOPHOSPHATE RESIDUES FROM AGRICULTURAL LAND IN WANASARI SUB-DISTRICT, BREBES, INDONESIA	396
<i>Joko Tri, Anggoro Sutrisno, Rya Sunoko Henna, Rachmawati Savitri</i>	
HAZARD IDENTIFICATION AND RISK ASSESSMENT IN WATER TREATMENT PLANT CONSIDERING ENVIRONMENTAL HEALTH AND SAFETY PRACTICE	401
<i>Falakh Fajrul, Setiani Onmy</i>	
INDOOR AIR POLLUTION IN NON AC PASSENGER BUS.....	406
<i>El Husna Iksiroh, Rizal Unzilattirrizqi D Yan El, Karyanto Yudi, Sunoko Henna R</i>	
COMPARISON OF SELLERS'S AWARENESS TO ENVIRONMENTAL HYGIENE OF MARKET BULAK, MARKET KLENDER AND MARKET RAWAMANGUN, EAST JAKARTA	409
<i>Hasana P. Maulidya</i>	
IMPLEMENTATION OF GEOGRAPHICAL INFORMATION SYSTEM FOR BACTERIOLOGICAL CONTAMINATION ANALYSIS ON REFILL DRINKING WATER DEPOT (STUDY IN TEMBALANG DISTRICT).....	413
<i>Rahmitha Amelia, Utami Endang Sri, Sitohang Marya Yenita</i>	
MEASURING CARBON FOOTPRINT OF FLEXIBLE PAVEMENT CONSTRUCTION PROJECT IN INDONESIA	418
<i>Utomo Dwi Hatmoko Jati, Hidayat Arif, Setiawati Apsari, Catur Adi Prasetyo Stefanus</i>	
THE INFLUENCE OF HIGHWAY TRANSPORTATION INFRASTRUCTURE CONDITION TOWARD COMMODITY PRODUCTION GENERATION FOR THE RESILIENCE NEEDS AT REGIONAL INTERNAL ZONE	425
<i>Abkardin Juang, Parikesit Danang, Riyanto Bambang, Taufik Mulyono Agus</i>	
THE EFFECTIVENESS OF BUILDING PERMIT REGULATION FOR GREEN OPEN SPACE AT HOUSING ESTATES: CASE STUDY OF KENDAL REGENCY, CENTRAL JAVA, INDONESIA	432
<i>Yulianti Wiwik, Hadi Sudharto P.</i>	
TOTAL ECONOMIC VALUE OF APPLIED USED GREEN LINE STREET MODEL FOR TAMARINDUS INDICA IN REMBANG DISTRICT	441
<i>Rangga Fajar Abdillah, Azis Nur Bambang</i>	
A RESILIENCE PATTERN IN VILLAGE LEVEL: THE CASE BABALAN VILLAGE, PATI, CENTRAL JAVA INDONESIA.....	447
<i>Nurwahyudi Ragil, Maryono Maryono</i>	
PRELIMINARY IDENTIFICATION OF URBAN PARK INFRASTRUCTURE RESILIENCE IN SEMARANG CENTRAL JAVA	453
<i>Uhfatun Muzdalifah Aji, Maryono Maryono</i>	
ANALYSIS OF URBAN FOREST NEEDS AS ANTHROPOGENIC (CO₂) GAS ABSORBENT IN SEMARANG CITY	458
<i>Putri Febriani Anisa, Retnaningsih Soeprbowati Tri, Maryono Maryono</i>	
COMPARING VALUE OF URBAN GREEN SPACE USING CONTINGENT VALUATION AND TRAVEL COST METHODS	463
<i>Chintantya Dea, Maryono Maryono</i>	
ASSESSING METHOD TO IDENTIFYING WATER RESILIENCE AGAINST NATURAL AND CLIMATE CHANGE HAZARDS.	467
<i>Amril Rofi, Maryono Maryono</i>	
THE POPULATION GROWTH AND CARRYING CAPACITY IN SEMARANG CITY	471
<i>Hariyanto, Hadi Sudharto P, Buchori Imam</i>	
THE ROLE OF HEALTH AND SAFETY EXPERTS IN THE MANAGEMENT OF HAZARDOUS AND TOXIC WASTES IN INDONESIA	475
<i>Supriyadi, Hadiyanto</i>	
THE APPLICATION POTENTIAL OF ECO-EFFICIENCY FOR GREENING COMPANY	479
<i>Eka Prasaja Lukman, Hadiyanto</i>	
MANAGEMENT TO INSULATE ECOSYSTEM SERVICES FROM THE EFFECTS OF CATCHMENT DEVELOPMENT.....	483
<i>Gell Peter</i>	

FIND THE FUTURE FROM THE PAST: PALEOLIMNOLOGY IN INDONESIA	489
<i>Retnaningsih Soeprbowati Tri, Widodo Agung Suedy Sri, Hadiyanto</i>	
ANALYSIS OF LANDSLIDE MATERIALS SPREADING IN BENDAN DHUWUR VILLAGE GAJAHMUNGKUR SUBDISTRICT SEMARANG CITY	497
<i>Trisnawati Devina, Najib, Kusuma Istiqomah Ari, Husna Anissa Fitratul</i>	
VULNERABILITY ASSESSMENT OF MANGROVE HABITAT TO THE VARIABLES OF THE OCEANOGRAPHY USING CVI METHOD (COASTAL VULNERABILITY INDEX) IN TRIMULYO MANGROVE AREA, GENUK DISTRICT, SEMARANG	503
<i>Raditya Ahmad Rifandi, Fuad Muhammad</i>	
ECO-EFFICIENCY ANALYSIS OF FURNITURE PRODUCT USING LIFE CYCLE ASSESSMENT	509
<i>Ika Rinawati Dyah, Sriyanto, Puspita Sari Diana, Cantya Prayodha Andana</i>	
EVALUATION OF WATER QUALITY AT RIVER BIAN IN MERAUKE PAPUA	514
<i>Djaja Irba, Purwanto P., Sunoko H. R.</i>	
THE ENVIRONMENTAL IMPACT STUDY OF MICRO HYDRO POWER IN PEKALONGAN INDONESIA	520
<i>Suwarto, Hadi Sudharto P, Hermawan</i>	
ANALYSIS OF A FISHERY MODEL WITH TWO COMPETING PREY SPECIES IN THE PRESENCE OF A PREDATOR SPECIES FOR OPTIMAL HARVESTING	527
<i>Sutimin, Khabibah Siti, Anis Munawwaroh Dita</i>	
CONSERVATION MANAGEMENT OF AGRICULTURE LAND USING GEOSPATIAL APPROACH (A CASE STUDY IN THE BONE WATERSHED, GORONTALO PROVINCE, INDONESIA)	533
<i>Maryati Sri, Eraku Sunarty, Kasim Muh</i>	

PART 2

CARBON VALUE ANALYSIS OF BATANG GADIS NATIONAL PARK, MANDAILING NATAL REGENCY, NORTH SUMATERA PROVINCE, INDONESIA	537
<i>Novalanty Ohara Dauly Dini, Wasiq Hidayat Jafron</i>	
THE EFFECTIVENESS OF HYBRID STRUCTURE IN OVERCOMING COASTAL ABRATION IN TRIMULYO, GENUK SUBDISTRICT SEMARANG CITY	545
<i>Kurnia Domas, Nugroho Denny</i>	
FISH MARKETING OF RIBBON FISH (TRICHIURUS SP.) IN NUSANTARA FISHING PORT (NFP)AT PALABUHANRATU, WEST JAVA	550
<i>Nur Bambang Azis</i>	
COMMUNITY STRUCTURE OF CORAL REEFS IN SAEBUS ISLAND, SUMENEP DISTRICT, EAST JAVA	555
<i>Rizmaadi Mada, Riter Johannes, Fatimah Siti, Rifaldi Riyan, Yoga Arditho, Ramadhan Fikri, Ambariyanto Ambariyanto</i>	
IMPLEMENTATION OF CONSERVATION POLICY THROUGH THE PROTECTION OF LIFE SUPPORT SYSTEM IN THE KARIMUNJAWA NATIONAL PARK	561
<i>Anisa Eka Ariyani Nur, Kismartini</i>	
THE APPLICATION OF LIQUID FERTILIZER MADE OF TRADITIONAL MARKET ORGANIC WASTES ON GROWTH OF SETARIA GRASS (SETARIA SPLENDIDA STAPF)	568
<i>Hendarto Eko, Suwarno</i>	
VEGETATION STRUCTURE OF EBONY LEAF MONKEY (TRACHYPITHECUS AURATUS) HABITAT IN KECUBUNG ULOLANANG NATURE PRESERVATION CENTRAL JAVA- INDONESIA	574
<i>Ervina Rahmawati, Jafron Wasiq Hidayat</i>	
INDIGENOUS PEOPLES INVOLMENT AT THE ENVIRONMENTAL IMPACT ASSESSMENT (EIA) PROCESS IN TABI MAMTA AREA OF PAPUA PROVINCE	579
<i>Saras Dhiksawan Ferdinand, Hadi Sudharto P., Samekto Adji, Sasongko Dwi P.</i>	
WATER FOOTPRINT ASSESSMENT IN THE AGRO-INDUSTRY: A CASE STUDY OF SOY SAUCE PRODUCTION	593
<i>Aulia Firda Alfiana, Purwanto</i>	
THE EXISTENCE OF HIGH CONSERVATION VALUE FOREST (HCVF) IN PERUM PERHUTANI KPH KENDAL TO SUPPORT IMPLEMENTATION OF FSC CERTIFICATION	596
<i>Sulistiyowati Sri, Hadi Sudharto P.</i>	

SUITABILITY ANALYSIS FOR SCUBA DIVING TO DEVELOP MARINE TOURISM AT SAEBUS ISLAND, EAST JAVA, INDONESIA	601
<i>Wijaya Putranto, Putra Tri, Hidayat Fatra, Levraeni Chandra, Rizmaadi Mada, Ambariyanto Ambariyanto</i>	
DIVERSITY OF CORAL FISH AT SAEBUS ISLAND, EAST JAVA, INDONESIA	606
<i>Fatimah Siti, Widya Laksana Putra Tri, Kondang Putranto, Suratman, Gamelia Larossa, Syahputra Hendry, Rahmadayanti, Rizmaaadi Mada, Ambariyanto Ambariyanto</i>	
MOTIVATION AND PERCEPTION OF TOURISTS AS PUSH AND PULL FACTORS TO VISIT NATIONAL PARK	611
<i>Said Jumrin, Maryono Maryono</i>	
COMMUNITY CONCERN ON ENVIRONMENTAL CONSERVATION.....	616
<i>Adie Nugraha Fajar, Maryono Maryono</i>	
ECONOMIC VALUATION AS AN INSTRUMENT TO DETERMINE THE MANAGEMENT STRATEGY OF BAROS MANGROVE FOREST, BANTUL, YOGYAKARTA, INDONESIA.....	620
<i>Waluyo Jati Irawan, Pribadi Rudhi</i>	
THE PROFILE QUALITY OF POND IN KENDAL REGENCY TO DIVERSIFICATION AQUACULTURE.....	624
<i>Novi Ayuniar Ligar, Wasiq Hidayat Jafron</i>	
STUDY OF CARRYING CAPACITY ASSESMENT FOR NATURAL FISHERIES IN JATIBARANG RESERVOIR IN SEMARANG CITY	629
<i>Sujono Bambang, Anggoro Sutrisno</i>	
SUSTAINABILITY ACTIVITIES IN THE MINING SECTOR: CURRENT STATUS AND CHALLENGES AHEAD LIMESTONE MINING IN NUSAKAMBANGAN	633
<i>Vika Ayuningrum Theresia, Purnaweni Hartuti</i>	
MANGROVE CULTIVATION FOR DEALING WITH COASTAL ABRASION CASE STUDY OF KARANGSONG	638
<i>Fatimatuzzahroh Feti, Hadi Sudharto P., Purnaweni Hartuti</i>	
THE EFFECT OF MANGROVE ON FISH CATCH USING BELAT AT TELUK PEMEDAS AND SANIPAH OF KUTAI KARTANEGARA REGENCY, EAST KALIMANTAN PROVINCE, INDONESIA	641
<i>Sulaiman Bustam, Nur Bambang Azis, Purnaweni Hartuti, Lutfi Mohammad</i>	
IMPACTS OF AGRICULTURAL PRACTICES AND TOURISM ACTIVITIES ON THE SUSTAINABILITY OF TELAGA WARNA AND TELAGA PENGILON LAKES, DIENG PLATEAU, CENTRAL JAVA	645
<i>Sudarmadji, Pudjiastuti Hermin</i>	
DOES GREEN INVESTMENT INCREASE FINANCIAL PERFORMANCE? EMPIRICAL EVIDENCE FROM INDONESIAN COMPANIES.....	652
<i>Chariri Anis, Ratna Sari Br Bukit Greta, Bethary Eklesia Octrine, Uly Christi Bourinta, Meirisa Tarigan Daisy</i>	
ENVIRONMENTAL POLICY OF MANGROVES MANAGEMENT IN REMBANG REGENCY	659
<i>Roziqin Ali</i>	
THE PROCESS OF PEOPLE GOLD MINING IN PANINGKABAN VILLAGE BANYUMAS INDONESIA	665
<i>Muslihudin Muslihudin, Nur Bambang Azis, Hendarto Eko, Triadi Putranto Thomas</i>	
IMPLEMENTATION OF STATE OBLIGATIONS AND RESPONSIBILITY ENSURING THE AVAILABILITY OF CLEAN WATER IN KARIMUNJAWA ISLANDS	670
<i>Rahayu, Soeprobawati Tri Retnaningsih</i>	
SPATIAL DISTRIBUTION OF CONVENTIONAL AIR POLLUTANT AND GHGS FROM LAND TRANSPORTATION IN TWO DEVELOPING CITIES AND MAIN CO-BENEFIT ACTIONS FOR REDUCING IT.	674
<i>Huboyo Haryono S, Sutrisno Endro, Sutrisno Ana M, Tiarani Velida L</i>	
CRITICAL REVIEW OF SPATIAL PLANNING OF CAT WATUPUTIH, REMBANG ZONE, CENTRAL JAVA, INDONESIA.....	678
<i>Hadi Sudharto P.</i>	
COMPARATIVE STUDY ON THE CHARACTERISTICS OF COMMUNITY-BASED TOURISM BETWEEN PENTINGSARI AND NGLANGGERAN TOURISM VILLAGE, SPECIAL REGION YOGYAKARTA.....	681
<i>Purbasari Novia, Manaf Asnawi</i>	
ENVIRONMENTAL ANALYSIS OF THE IMPACTS OF BATIK WASTE WATER POLUTION ON THE QUALITY OF DUG WELL WATER IN THE BATIK INDUSTRIAL CENTER OF JENGGOT PEKALONGAN CITY	693
<i>Budiyanto Slamet, Anies, Purnaweni Hartuti, Rya Sunoko Henna</i>	

COASTAL COMMUNITY GROUP FOR COASTAL RESILIENT IN TIMBULSLOKO VILLAGE, SAYUNG, DEMAK REGENCY, INDONESIA	700
<i>Purnaweni Hartuti, Kismartini, Hadi Sudharto P., Soraya Ike</i>	
URBAN ENVIRONMENT DEVELOPMENT BASED ON UNIVERSAL DESIGN PRINCIPLES	704
<i>Ir Harsritanto Bangun</i>	
TOURISM VILLAGE MODEL BASED ON LOCAL INDIGENOUS: CASE STUDY OF NONGKOSAWIT TOURISM VILLAGE, GUNUNGPATI, SEMARANG.....	709
<i>Kurniasih, Maya Nihayah Dyah, Amalia Sudibyo Syafitri, Nur Winda Fajri</i>	
TOWARDS WATER SENSITIVE CITY: LESSON LEARNED FROM BOGOR FLOOD HAZARD IN 2017.....	715
<i>Ramadhan Muhammad, Susilo Arifin Hadi, Suharnoto Yuli, Darma Tarigan Suria</i>	
IMPLEMENTING COGNITIVE INTERVENTION TO EDUCATE AND IMPROVE RESIDENT'S PREPAREDNESS IN LANDSLIDE AREAS.....	720
<i>Susanto Novie, Putranto Thomas Triadi, Prastawa Heru, Amalia Ulfa Ema</i>	
UTILIZATION OF INFORMATION TECHNOLOGY FOR NON DOMESTIC WASTE MANAGEMENT IN SEMARANG CITY	727
<i>Ali Muhammad, Hadi Sudharto P, Soemantri Maman</i>	
POLICY IMPLEMENTATION STUDY ON SPATIAL PLANNING FOR ENVIRONMENTAL CONFLICT (STUDY LOCATION: REMBANG REGENCY).....	733
<i>Kusyuniadi Indraya</i>	
CLIMATE CHANGE ANTICIPATION ON SUPPORTING CAPACITY OF FISHING ENVIRONMENT IN THE COASTAL AREA OF TANJUNG MAS SEMARANG CITY	741
<i>Kurniasih Wahyu Sari Indah, Hadi Sudharto P.</i>	
CLIMATE CHANGE IN INDONESIA (CASE STUDY : MEDAN, PALEMBANG, SEMARANG).....	748
<i>Suryadi Yadi, Nugroho Sugianto Denny, Hadiyanto</i>

Understanding customers' intention to use social network sites as complaint channel: an analysis of young customers' perspectives

Retno Agus Setiawan^{1,*}, Djoko Budiyo Setyohadi², Pranowo²

¹Master Program of Information Technology, School of Postgraduate Studies, Universitas Atma Jaya Yogyakarta, Yogyakarta - Indonesia

²Department of Information Technology, Faculty of Industrial Engineering, Universitas Atma Jaya Yogyakarta, Yogyakarta - Indonesia

Abstract. Social network sites (SNSs) have grown rapidly in recent years. More and more companies have used SNSs as part of their business strategy. SNSs offer numerous advantages, especially in enhancing communication. SNSs have a potential as a new complaint channel for young customers to file their complaints to companies. The objective of this study is to investigate the acceptance of SNSs as complaint channel based on TAM. A structured questionnaire was distributed to young participants, which collected 222 valid questionnaires. Furthermore, structural equation modeling was utilized to investigate the structural model. The results revealed that perceived ease of use and perceived usefulness have a positive correlation on the attitude towards SNSs. While the attitude plays an important role in understanding customers' intention to use SNSs to voice complaints. However perceived usefulness has no significant impact on intention to use. Limitations and further research were also discussed.

1 Introduction

Technology acceptance model (TAM) suggested by Davis [1], is an effort to explain the adoption process of any technology within organization. TAM has been extensively utilized to explain the determinants influencing users' acceptance of the technology [2]. TAM suggests that users' perceptions about usefulness and ease of use are two key elements that determine the adoption of various technologies. Conforming to Davis et al [3], the attitudes toward using technology can be described by perceived ease of use and usefulness, while attitudes will influence behavioral intention and usage behavior.

TAM is an essential model for understanding an individuals' attitude and trustworthiness of use technology through the individuals' beliefs about a technology is useful and effortless [4]. When users are introduced with a new technology, perceived ease of use and usefulness are two significant determinants that affect their decision to use it. TAM has been examined with kind of technologies and populations and has been confirmed to be an important and effective model in predicting the acceptance of technologies [5].

In recent years, technology has grown rapidly, particularly social network sites (SNSs). The use of SNSs has increased and SNSs have grown very popular among internet users. As of January 2016, more than 79 million people in Indonesia use SNSs, accounting for 89% of its internet population [6]. In addition, Facebook has almost 12 million active users, Google+ has 9 million active users, and more than 170 minutes are

spent on SNSs per day. There is no doubt that SNSs offer many advantages for its users. SNSs provide a huge amount of data [7]. SNSs may allow quick access to a huge audience and almost no cost [8]. Furthermore, SNSs also provide a broad way to communicate with anyone anywhere with no geographical limitations.

More and more companies have used SNSs as part of business strategy. In order to obtain the advantages of SNSs, companies need to understand the nature of SNSs and how it is used [5]. Generally, TAM is frequently utilized to understand the use of new technology. Few studies have successfully used TAM to explain the factors that affect the acceptance of SNSs [5][9][10]. Furthermore, in light of business tools, SNSs can be used as tools for customer engagement. According to Garding & Bruns [11], SNSs have the potential as a new complaint channel to accommodate any complaints voiced by customers. Customers may use SNSs to file their complaints to companies.

Mattila & Wirtz [12] defined complaint channel as the tool that allows customers to address their complaints about the products or services related to the company. Complaints are derived from customers provide an overview to analyze about issues and make the right decisions to make sure that issues do not occur again [13]. The adequacy of complaint channels is essential towards realizing a successful complaint management [14]. However, it should be noted that these channels are not all suitable from a customer's point of view. Thus, companies should think deeply in determining communication channels.

* Corresponding author: retnoagussetiawan@gmail.com

Mattila & Wirtz [12] examined the possibility of communication channels for customer to file complaints. They examined the traditional communication channels telephone, face to face, mail, and email. Generally, these communication channels are suitable for making a complaint [15]. Mattila & Wirtz [12] revealed that the choice of communication channels depends on customers' motivation when voicing a complaint. However, not all customer groups are willing to voice their complaints to companies. When customer groups "young non-complainers" decide to complain, they would choose SNSs to voice their complaints to companies [16]. SNSs can be implemented as complaint channel to motivate younger customer to voice their complaints.

Based on the above brief background of the problem, this study examined the acceptance of social network sites as complaint channel. This study aims to examine whether TAM can predict the use of SNSs in the context of complaint channel, especially from a younger customers' perspectives. Several studies have found that TAM is useful to explain SNSs adoption [5][9]. Therefore, this study used the basic framework of TAM to explain the acceptance of SNSs as complaint channel.

2 Literature review

2.1 Complaint management

In business activities, not all business deals lead to customer satisfaction [14]. Dissatisfaction may come with some reasons. For example, there is a difference between customers' expectations towards a product or service. When this happens, customers may voice their complaints to companies. Customer complaints provide an occasion to analyze about issues and take possible reaction to resolve service failures [13]. Companies can collect information from all complainants into account as sources of meaningful knowledge that can be used to improve their performance. A good quality of complaint handling can generate satisfied and loyal customers. Furthermore, a successful complaint management can provide myriad of benefits for companies.

The accessibility of complaint channels is a key determinant for realizing a successful complaint management. Mattila & Wirtz [12] defined complaint channel as the medium that customers use to file a complaint to companies. Companies also use these channel to respond to customer complaints. There are several popular communication channels like telephone, face to face, mail, and email, which commonly used for making a complaint. In addition, SNSs emerged as a modern communication channel which increasingly important [17]. SNSs may have capability as new complaint channel based on their unique characteristics.

Finally, complaint management is necessary for company's strategies. A successful complaint management may help companies to keep their market by maintain customer satisfaction. Furthermore, the success of complaint handling provides customer satisfaction and prevents negative behavior from

customers [12]. A good complaint management can help to enhance the relation between companies and customers.

2.2 Technology acceptance model and social network sites

Introduced by Davis, technology acceptance model (TAM) was adapted from theory of planned behavior (TPB) by Ajzen [18] and theory of reasoned (TRA) by Fishbein & Ajzen [19]. TAM is a model that developed to predict and analyze the adoption of technology. Within TAM there are two main factors, perceived ease of use and perceived usefulness, which influence the adoption of technology. Perceived ease of use is defined as "the extent to which individuals believe that using a specific system will be effortless". Meanwhile, perceived usefulness is defined as "the extent to which individuals believe that using a specific system will enhance their work performance" [1]. Furthermore, Davis et al [3] argued that both variables may influence user attitude towards using a technology and then affect users' intention to use. TAM has grown into a major model in explaining the predictions of individuals' behavior towards the adoption or rejection of technology. The effectiveness of this model is verified by various researches that apply it extensively to numerous technologies [2].

In general, TAM has been commonly utilized and consistently explains the adoption of various technologies. Several researches have effectively utilized TAM to evaluate the adoption of numerous technologies, including Tablet PCs [20], Cloud Computing [21], Instant messaging [22], and Social network sites [5][10][23][24][25]. Willis [5] investigated whether TAM is feasible to be utilized to explain the acceptance of SNSs technology which has a relationship-oriented. The results indicated that TAM deserves to be utilized to explain the acceptance of SNS technology. Furthermore, this results have been confirmed by Constantinides et al [9], which revealed that TAM can explain and predict the usage of SNSs.

Willis [5] applied TAM to explain the determinants influencing the acceptance of SNSs by presenting a new model that contains the influences of past experience. The results indicated that prior experience significantly correlated to intention to use, perceived ease of use, and perceived usefulness. However, the results revealed the negative effects of prior experience on subjective norm.

Pinho & Soares [23] identified the determinants that affecting the adoption of SNSs among students. The results demonstrated that perceived ease of use and usefulness positively influence individuals' intention to use SNSs. They believe that SNSs is easy to use, they quickly become expert at using SNSs. In addition, the attitude toward using SNSs significantly correlated to individuals' intention to use, as respondents who believe that SNSs are quite fun to use are willing to use these technologies. However, the results do not support the influences of perceived usefulness on intention to use.

Due to the fact that businesses are continuously interested in SNSs as a source of valuable data, Constantinides et al [9] identified the determinants that affecting the acceptance and use of SNSs as a business tool in marketing strategy. They revealed that ease of use significantly affects perceived usefulness of SNSs, both variables have an indirect influence on individuals' intention through the attitude and a direct and significant influence on intention to use. In addition, intention to use has a positive correlation on the level of use SNSs.

Chiu and Huang [24] attempted to identify the determinants that may influence individuals participation in SNSs. The results indicated that the attitudes towards SNSs have a positive influence on individual intention. Perceived ease of use and usefulness significantly affect behavior and attitude. In addition, it was shown that there is a significant correlation among use behavior and behavioral intention. However, the results noted that perceived usefulness has no significant influence on individual intention.

Yeh et al [10] applied TAM to investigate the adoption of SNSs in the context of human resource, with a particular focus on staffing activities within the organization. Subjective norm has been added to the research model with a belief that SNSs have a social aspect that may affect the adoption of these technologies. The results demonstrated that subjective norm, perceived ease of use and usefulness have a positive correlation on human resource practitioners' intentions to use SNSs in organizational staffing activities.

Furthermore, Yoon et al [22] identified online communication technology that have similar characteristics as SNSs. They identified the influence of social aspects on the adoption of new technologies. In addition to social aspects, the results indicated that perceived usefulness positively correlated to intention to use. However, the results additionally indicated that perceived ease of use has no significant correlation on perceived usefulness.

3 Research model and hypotheses

In this study, technology acceptance model was utilized as the major model to explain the adoption of SNSs in the context of complaint channel. The research model contains perceived ease of use, perceived usefulness, attitude, and intention to use.

3.1 Perceived usefulness, perceived ease of use, and attitude

Davis et al. [3] argue that individuals' motivation can be interpreted by three factors; attitude, perceived usefulness, and perceived ease of use. Perceived usefulness and perceived ease of use are key determinants affecting attitude, where perceived ease of use has a direct influence on perceived usefulness. In the context of SNSs, prior study has confirmed these relationships [9]. They revealed that ease of use and usefulness significantly correlated with user perceptions

and attitude toward SNSs. Thus, this study suggests the following hypotheses:

H1: Perceived usefulness of SNSs as complaint channel has a positive and significant influence on the attitude toward using them.

H2: Perceived ease of use of SNSs as complaint channel has a positive and significant influence on the attitude toward using them

H3: Perceived ease of use of SNSs as complaint channel has a positive and significant influence on perceived usefulness of using them

3.2 Attitude and intention to use

The correlation among attitude and intention to use is essential and popular in behavioral models. Individuals' attitudes towards technology have a significant correlation on intention to use [9]. This correlation has been confirmed by several studies. They found a strong influence of attitude on individuals' intention to use SNSs [25]. Moreover, the following hypothesis is suggested:

H4: Attitude toward using SNSs as complaint channel has a positive and significant influence on intention to use them.

3.3 Perceived usefulness and intention to use

The findings have consistently shown that perceived usefulness is the key determinant that affect users' intention to use technology [2]. Previous researches have revealed that there is a significant correlation among perceived usefulness and intention to use [5] [9]. Furthermore, Constantinides et al [9] revealed that perceived usefulness positively affected intention to use. Then, the following hypothesis is proposed in this study:

H5: Perceived usefulness of SNSs as complaint channel has a positive and significant influence on intention to use them

4 Research methodology

This study used SPSS to analyze the data and applied structural equation modeling to investigate the hypothesized correlations in the research model using AMOS.

4.1 Sample and data collection

To achieve the goal of this study, a survey method was applied to gather data from participants. This study selected participants who have an active SNSs account. The target participants for this study were young consumers aged 18 and 30 years old. At first, this study organized a pre-test survey on 30 SNSs users to test the consistency of measurement items. In addition, this pre-test was conducted to ensure unambiguousness of each question and to calculate the time participants required to

complete the questionnaire. Furthermore the questionnaire was distributed in two ways, paper and electronic questionnaire. 79 paper questionnaires and 196 electronic questionnaires were distributed. Overall, 275 questionnaires were collected. However, only 222 were included in the sample for analysis, 53 responses were deleted because of incompleteness and contained the same values for all questions. The profiles of participants are listed in Table 1.

Table 1. Demographic profile of participants (N=222)

	Frequency	Percentage
<i>Gender</i>		
Male	121	54.5
Female	101	45.5
<i>Age</i>		
18 – 24	181	81.5
25 – 30	41	18.5
<i>Educational level</i>		
Senior high school	92	41.4
3-year diploma	14	6.3
Bachelor	113	50.9
Postgraduate	3	1.4
<i>Occupation</i>		
Students	129	58.1
Private employees	50	22.5
Public servants	4	1.8
Others	39	17.6
<i>Subscription period of the SNS</i>		
< 6 months	1	0.5
6 months – 1 year	4	1.8
1 – 3 years	20	9.0
More than 3 years	197	88.7
<i>Frequency of using SNS</i>		
Few/barely	22	9.9
Frequently	64	28.8
Every day	136	61.3

4.2 Measurement items

This study adapted questionnaire items from prior researches and were all checked by 5-points Likert scale from strongly disagree (1) to strongly agree (5). Items of perceived usefulness were adapted from Davis [1], Constantinides et al [9], Kwon et al [25], Hung et al [26], Seol et al [27], Ernst [28], and Mouakket [29]. Items of perceived ease of use were adapted from Davis [1], Willis [5], Constantinides et al [9], Hung et al [26], Ernst [28], and Hsu et al [30]. Items of attitude were adapted from Constantinides et al [9], Kwon et al [25], Hung et al [26], and Hsu et al [30]. While items of intention to use were adapted from studies organized by Constantinides et al [9], Kwon et al [25], Hung et al [26], and Balakrishnan [31].

5 Data analysis and results

5.1 Measurement model

This study applied a confirmatory factor analysis (CFA) to examine the measurement model. AMOS software was utilized to perform the analysis. The results indicated that several model fit indices did not meet the standard basically. Thus, the model was optimized and several responses were deleted according to modification indices. As a result, all fit indices have better values. The *p-value* was 0.088 ($\chi^2 = 58.325$, $df = 45$), which greater than 0.05, indicating a good fit. The normed chi-square (χ^2/df) was 1.296, while the normed chi-square value should be less than 5 [32]. The GFI and AGFI were 0.941 and 0.898, respectively, showing a good fit [33]. Then, the RMSEA was 0.044, which is below the maximum value of 0.08 [34]. The other fit indices NFI, TLI, and CFI were 0.960, 0.990, and 0.986, respectively, all exceed the suggested value of 0.9 [35][36]. Therefore, the overall fit indices indicate an acceptable model fit.

Furthermore, this study investigated the reliability and validity of the measurement model. All the average variance extracted (AVE) and factor loadings must be exceed 0.5 [37]. As shown in Table 2, most loadings loaded highly above 0.70. The value of AVE for various construct is larger than 0.50. Then, the composite reliability (CR) must be larger than the AVE. The CR values for each construct varied between 0.802 and 0.917, which above the recommended value of 0.70 [37]. These results indicate good validity of all measurement items. Furthermore, the cronbach's alpha for various construct exceeded Nunnally's [38] recommendation of 0.70, indicating internal consistency and good reliability.

Table 2. Factor loadings, AVE, CR, and Alpha values

Items	Factor loadings	AVE	CR	Alpha
<i>Perceived usefulness</i>				
PU1	0.81	0.79	0.92	0.91
PU2	0.96			
PU3	0.89			
<i>Perceived ease of use</i>				
PEOU2	0.75	0.67	0.86	0.88
PEOU3	0.80			
PEOU4	0.89			
<i>Attitude</i>				
AT1	0.67	0.68	0.86	0.84
AT2	0.86			
AT3	0.93			
<i>Intention to use</i>				
IU1	0.88	0.58	0.80	0.85
IU2	0.70			
IU3	0.69			

Source: Author calculations

Table 3. Structural model results

Fit indices	Measurement model	Structural model	Recommended values
Chi square/degrees freedom (χ^2/df)	1.296	1.270	<5.00 Hair et al [32]
Goodness-of-fit index (GFI)	0.941	0.941	>0.90 Baumgartner & Homburg [33]
Adjusted goodness-of-fit (AGFI)	0.898	0.900	>0.80 Baumgartner & Homburg [33]
Root mean square error of approximation (RMSEA)	0.044	0.042	<0.08 Hair et al [34]
Normalized fit index (NFI)	0.960	0.960	>0.90 Hu & Bentler [36]
Comparative fit index (CFI)	0.990	0.991	>0.90 Hu & Bentler [36]
Tucker Lewis index (TLI)	0.986	0.987	>0.90 Bagozzi & Yi [35]

Source: Author calculations

5.2 Structural model

This study also conducted a structural equation modeling to explain the hypothesized correlations among various constructs. As Table 3 shown, the overall fit indices for the research model suggest a very good model fit (p -value=0.104, χ^2/df =1.270, GFI=0.941, AGFI=0.900, RMSEA=0.042, NFI=0.960, CFI=0.991, and TLI=0.987).

Since the research model demonstrated a good fitness, this study examined the causal relationships between constructs. As Fig. 1 shown, the results indicate that perceived usefulness (β =0.260, t -value=1.972, p <0.05) and perceived ease of use (β =0.515, t -value=3.685, p <0.001) have a positive related to the attitude, confirming hypothesis H1 and H2. Then, perceived ease of use has a significant influence on perceived usefulness (β =0.810, t -value=10.148, p <0.001), supporting hypothesis H3. The results also found support for hypothesis H4, the attitude toward using SNSs has a strong correlation with intention to use (β =0.960, t -value=8.460, p <0.001). However, the perceived usefulness of SNSs is found to have no significant impact on intention to use (β =0.34, t -value=0.473, p >0.05). Thus, hypothesis H5 is not supported. In addition, based on squared multiple correlations (R^2), perceived ease of use explains about 65.6% of variance in perceived usefulness. Perceived usefulness and ease of use together explain 54.9% of variance in the attitude toward SNSs. Meanwhile, perceived usefulness and attitude jointly explain 96.7% variance in intention to use.

Fig. 1. Structural model results.

6 Discussions and conclusions

The use of SNSs has grown rapidly and very popular among young users. In addition, SNSs have been widely used by companies because of their clear benefits from a business point of view. SNSs offer two-way communication among the companies and customers. Customers may file their complaints to the company through SNSs quickly. Moreover, companies can easily gain feedback from customers. These possibilities have led to interest in evaluating the adoption of SNSs as complaint channel, particularly for young customers. Furthermore, this study confirms the explanatory power of technology acceptance model in the adoption of SNSs.

As listed in Table 4, most hypotheses were supported except the relationship among perceived usefulness and intention to use. The results indicate that ease of use positively influences perceived usefulness and both variables have an indirect influence on intention to use through the attitude toward SNSs. However, perceived usefulness of SNSs as complaint channel has no significant influence on intention to use them.

Table 4. Hypothesis testing results

Hypothesis	Std. Coefficient	t-value	Supported
H1: PU → AT	0.260	1.972**	Yes
H2: PEOU → AT	0.515	3.685***	Yes
H3: PEOU → PU	0.810	10.148***	Yes
H4: AT → IU	0.960	8.460***	Yes
H5: PU → IU	0.340	0.473**	No

Perceived usefulness (PU); Perceived ease of use (PEOU); Attitude (AT); Intention to use (IU).

The results indicate that perceived ease of use and perceived usefulness significantly and positively correlated with attitude, which is consistent with prior studies [9][10][23]. They revealed that perceived usefulness and ease of use positively correlated with attitude. Furthermore, perceived ease of use (β =0.515) has a greater effect on attitude than perceived usefulness (β =0.260). Similar to a prior study by Constantinides et al [9], the results show that perceived ease of use of SNSs has a direct impact on perceived usefulness of using them.

Perceived ease of use reflects the consumers believe that contacting the company will be effortless. They have no difficulty completing a complaint procedure. Furthermore, some participants believe that using SNSs will enhance their effectiveness in voicing their complaints to companies. SNSs allow the consumers to file their complaints quickly. The results suggest that maintaining easy and useful policies and procedures are essential prerequisites for delivering positive attitudes.

In light of attitudes, the attitude toward SNSs as complaint channel is a major determinant in understanding customers' intention to use them, as shown by the huge value of path coefficient for itself. This result is consistent with prior studies, which verified the role of attitude in user adoption [9][23][24]. Furthermore, Balakrishnan [31] stated that user who feels positive in using the tools for working may literally use them for working. Similarly, consumers who feel positively about using SNSs as complaint channel may actually take the initiative to use them for delivering complaints to companies.

However, it should be noted that individual attitudes may change immediately. Therefore, continuous supports should be granted to preserve the attitude. User-friendly, low-time consumption (*the time consumers needed to complete a complaint procedure*), and fast response should be given to maintain the positive attitudes. Furthermore, in the initial stage, complaints that are delivered through SNSs must be managed properly in order to eliminate prejudgments. In addition, companies must have the ability to adapt the procedures to fit the consumer needs. In the end, the results reject the hypothesis perceived usefulness significantly correlated to intention to use. The rejection of this correlation is consistent with prior study by Pinho & Soares [23], perceived usefulness does not have positive correlation with intention to use.

This study, however, has some limitations. First, this study was established in single country, Indonesia. The majority of the participants were from special region of Yogyakarta, where it is known as a centre of education and culture. Accordingly, the results of this study should be generalized carefully. Second, the present study focuses only on young adults who are member of social network sites as a target population. Participants in this age segment may be more active in using social network sites. Third, the influence of demographic factors such as gender, and occupation were not considered in this study. Thus, these factors should be examined in further research. Lastly, this study not focused on particular social network sites. Future studies could examine the particular SNSs such as Twitter and Facebook as complaint channel.
