STATEMENT OF THESIS AUTHENTICITY

I, Yohanes Kristiawan Hartono hereby declare that I compiled the thesis with the following title:

**THE IMPACT OF CAMELS FINANCIAL RATIO TO THE BANK
PERFORMANCE:
AN EMPIRICAL STUDY ON THE BANKS WITH CAPITAL BETWEEN
1 TRILLION TO 50 TRILLION RUPIAHS IN 2005-2009**

Is really my own thinking and writing. I fully acknowledge that my writing does not contain others or parts of others writing, except for those that have been cited in the references.

Yogyakarta, 15 December 2010

Which states,

Yohanes Kristiawan Hartono

This Thesis Is Dedicated To:

Lord Jesus Christ

My Beloved Family

Lisa

All of my friends

ACKNOWLEDGEMENT

Thanks to the Lord Jesus Christ for blessing, mercy, and grace so that this thesis can be resolved by the author. Thanks for always brings me an opportunity, support and victory, so I can finished this writing and finished my study at Atma Jaya Yogyakarta University.

This thesis is presented as partial fulfillment of the requirements for the degree of Sarjana Ekonomi (S1) in Management Program, Faculty of Economic Atma Jaya University Yogyakarta. The title of the thesis is “THE IMPACT OF CAMELS FINANCIAL RATIO TO THE BANK PERFORMANCE: AN EMPIRICAL STUDY ON THE BANKS WITH CAPITAL BETWEEN 1 TRILLION TO 50 TRILLION RUPIAHS IN 2005-2009”.

In this Opportunity I want to give thanks to all people that always assist, support, encourage and teach me, they are:

1. Lord Jesus Christ, above all blessing, grace and love so that this thesis can be resolved.
2. Prof. Dr. J. Sukmawati S., MM. as a supervisor who has spent time to provide guidance and advice so that this thesis can be resolved.
3. Mr. Alex Jatmiko Wibowo, SE., SIP., M.SF that lecture finance on international class, test writers and provide valuable input on this essay.

4. Mr. Felix Wisnu Isdaryadi, Drs., MBA that test writers and provide valuable input on this essay.
5. The teaching staff, library staff, and staff of FE Securities Gallery UAJY who have provided guidance and assistance during the writer studying in UAJY.
6. Papa and Mama for the support and affection that always given.
7. Lisa on all the attention, affection, assistance, patience, who always accompany the author until this thesis is finished. Thank you for always encourage me to do the thesis.
8. All of my friends in the International class 2007. Thank you for the wonderful moment guys.
9. My friends in KSPM especially David. Thanks for taking your time to discussing my thesis.
10. All my friends and those who have give support and prayers for this thesis quickly resolved.

The writer realizes that there are still a lot of mistake in this thesis, let the writer apologizes before. Suggestions and comments are very welcome for the improvements of this thesis. At least but not last the writer hopes that this thesis can bring advantages and useful to readers.

Yogyakarta, December 2010

The research is about the analysis of impact of the CAMELS financial ratios to the Bank Performance. In this case the writer use Return on Assets as the proxy for Bank Performance. The objective of This research performed in order to test the influence of the variable, Capital Adequacy Ratio (CAR), Non Performing Loan (NPL), Provision Fulfillment Earning Assets (PPAP) Net Interest Margin (NIM), Return on Equity (ROE), Operational Expenses Operational Income (BOPO), Loan to Deposit Ratio (LDR), and Sensitivity to Market risk (CARS) toward Return on Asset (ROA). Using purposive sampling method, the writer has selected 47 banks with 1 trillion up to 50 trillion rupiahs of assets according to classification stated in Indonesia Banking Architects from Central Bank.

The Research uses Pooled Least Square (PLS) method with Eview3 software. Data analyzed with multi linear regression of Pooled least square and hypotheses test used t-statistic and F-statistic at level of significance 5%.

The research finds out that the model of this study may explain the dependent variable Return on Assets (ROA) of 89.17%. The F-test show that simultaneously the dependent variables effect on ROA, in α level of 95%. Capital Adequacy Ratio (CAR), Return on Equity (ROE), Net Interest Margin (NIM), Operational Expenses Operational Income (BOPO) proven to significantly influence Return on Assets.
