DECLARATION ORIGINALITY

Undersigned below:

Name : Juniver Alkasih Pesoa

NPM : 13 14 07268

Hereby declare that my final project under the title "Enhancement and Simplification Reverse Engineering Process on Dining Set Ceramic with Islamic Nuance" is the result of my research in the 2017/2018 Academic Year which is original and contains no plagiarism from any work.

If there is any incompatibility with this statement in the future, then I am willing to be prosecuted and processed in accordance with the applicable provisions including to be revoked a Bachelor degree that has been granted Atma Jaya University Yogyakarta to me.

Thus this statement is made in truth.

INTRODUCTION

Thanks to the presence of God Almighty for the blessing of His grace, the author can compile and complete this Final Project well and just in time. Final Writing is done to meet one of the requirements to achieve the degree of Bachelor of Engineering in Industrial Engineering Program, Faculty of Industrial Technology, University of Atma Jaya Yogyakarta.

The preparation, implementation and completion of this Final Project cannot be separated from the assistance by several parties, either directly or indirectly. On this occasion, the author would like to thank to :

1. Parents and family who always provide criticism, direction, advice, guidance and encouragement to always be diligent and eager in completing this Final Project.
2. Mr. Drs. A. Teguh Siswanto, M.Sc. as the Dean of Faculty of Industrial Technology,, Universitas Atma Jaya Yogyakarta.
3. Mrs. Ririn Diar A, S.T., M.T. as Head of Industrial Engineering Program, Universitas Atma Jaya Yogyakarta.
4. Mr. Tonny Yuniarto S.T., M.Eng. as the lead counselor who has guided, providing constructive criticism and suggestions in progress to completion of Final Project.
5. Mr. Paul Wisnu Anggoro, S.T., M.T. for his willingness to be an informal counselor who has always provided direction, views, information, and constructive suggestions in the work of this Final Project.
6. Mr. R.B.Wibowo who has been willing to provide facilities and infrastructure in PT. Nuansa Porselain Indonesia to facilitate the researcher for the process of discussion and data retrieval.
7. Mr O.K.W. Widyanugraha who has been willing to take the time and effort to provide insight and ideas in writing this Final Project.
8. Employees of PT. Nuance Porselain Indonesia who has been willing to spend his thoughts, energy, and time to provide ideas in writing this Final Project and willing to accept researchers for the process of retrieving data reset.
9. PT. Delcam Indonesia as a supplier of CAD / CAM software that has provided PowerShape 2017 software, PowerMill 2016, ArtCAM 2015 in research process in Final Project.

10. Many parties are related and cannot be mentioned one by one.

In conclusion the authors hope that this report can be useful for others and is expected to provide suggestions so that this report can be better for the future.

ABSTRACT

Tableware is one of the ceramic handicraft products that are currently widely used by the community as an equipment to eat or decorate the room. One of the companies engaged in this field is PT. NPI. New ideas are being done by NPI today is the latest innovation in tableware dining set with Islamic Batik Ornament. However, special ceramic design processes in PT.NPI still use conventional or handmade technology, so it takes a long design time of about two to three months of the design process and the manufacture of master mold patterns. This will cause the company to experience delay in the fabrication process of ceramic dining set

To solve this problem, researchers use the technology of Computer Aided Reverse Engineering System. The method of data collection until the fabrication process is Reverse Engineering. Software to be used is ArtCAM 2015, PowerSHAPE 2017, PowerMILL 2016.

The output of this research is, getting some important parameters on the dining set design that is characteristic of Islamic. Dining set used is, Big Plate, Saucer, Bowl, Cup.

Keywords : Computer Aided Design (CAD), Computer Aided Manufacturing (CAM), Tableware Dining Set Ornament Islamic.
