PREFACE

The writer would like to express thank to Jesus Christ for grant and blessing so that the final project with the title RISK MANAGEMENT IDENTIFICATION IN CONSTRUCTION COMPANIES IN YOGYAKARTA has completed as a prerequisite for finishing the study at International S1 Program, Civil Engineering Department, Faculty of Engineering, University of Atma Jaya Yogyakarta.

During the writing process, the writer has received many supports, both directly and indirectly which are consisting of suggestions and instructions. Be aware of supports from many people, the writing process of this final project will not be realized.

At this good opportunity, the writer would like to express thank to:
1. Lord Jesus Christ, thanks for His blessing, help, guidance and hope to the writer.

2. Ir. Eko Setyanto, MCM, as the advisor of this final project, thanks for all the support, guidance, attention, motivation and patience and advice that is very meaningful to the writer during the research from start to finish.

3. Ir. Y. Lulie, M.T., as the Head of International S1 Program Civil Engineering of Atma Jaya Yogyakarta University.

4. Mr. Wiko as the officer of International S1 Program Civil Engineering of Atma Jaya University Yogyakarta, thanks for helping the writer during his study at International S1 Program Civil Engineering of Atma Jaya Yogyakarta University.

5. Father, mother, and my sisters, thanks for keep supporting me in every situation.
6. Tante Melly, thanks for all the support and pray.

7. Maria Yunike, ST, MT thanks for all the love, support and pray.

8. All International Civil Engineering students, especially for Class of 2003. Thanks for the time that we have ever spent together.

9. All of friends and relatives for supporting.

Finally, the writer realizes that this project is far infallible, whereas the writer has limitedness and unperfected abilities. Hopefully this final project has benefit for require circles.

Yogyakarta, March, 2011

ABSTRACT

RISK MANAGEMENT IDENTIFICATION IN CONSTRUCTION COMPANIES IN YOGYAKARTA, prepared by Jimmy Himawan, SN: 03 13 11465, year of 2010, Civil Engineering, Engineering Faculty, Atma Jaya Yogyakarta University.

Risk is the most important part of the implementation of risk management because the risk is at the root of the object theory and the problems that used to develop techniques and analysis in tackling the risk itself. Research conducted at Large Contractor Company in Yogyakarta and which has a branch office in Yogyakarta.

This research conducted using descriptive quantitative method, the research itself conducted with literature studies and field studies. In literature study, references about risk management collected from various sources, both books and journals. This study aimed to know the basic theories that support research. Field study is to conduct direct interviews with staff at the corporate contractors who understand and are directly involved with project management.

The results of the research are: risk management is already applied at large contractor company in Yogyakarta.

Keywords: risk management, and large contractor company.
