ACKNOWLEDGEMENT

To S.J. that was, is, will be, and always be there.

FOREWORD

Thanks to God for the blessings that He gives that make the author able to accomplish this last project, "DEVELOPMENT of SCHEDULING PROGRAM at Stamping Tools Division P.T. Mekar Armada Jaya Magelang", on His time. This final project is made as the partial fulfillment of the requirement for the degree of Sarjana Teknik in Industrial Engineering degree of Industrial Engineering from Universitas Atma Jaya Yogyakarta.

The author also wants to thank for all the parties that help in accomplishing this final project, especially for:

- 1. Mr. Ir. B. Kristyanto, M.Eng, Ph. D as the Dean of Industrial Technology Faculty UAJY.
- 2. Mr. The Jin Ai, D.Eng. as the Chief of Industrial Engineering Study Program FTI UAJY and also as the adviser of this project. Thank you very much for the patience and the overtime.
- 3. Mrs. Ririn Diar Astanti, D.Eng as the Chief of International Industrial Technology Study Program FTI UAJY. Also, thank you for the patience.
- 4. Mr. V. Ariyono S.T., M.T. as the co adviser of this final Project.
- 5. All lecturers, employees in UAJY.
- 6. Pek Cong, Ku Aicu, and all of Ceks and Mus that make me can be at this moment.
- 7. My best friends forever: Bertha Lestari and Elisa Christina (Attention, Count Down to the "Big Plan"), Fiona Olivia (Thank you for always taking

- my side) Felix Soegito, Ade Lukmanto, Shendy Isyanto(I wish we were always in that era).
- 8. All of friends that I know until this time, I can't be like this without them. And of course TIKI 2007.
- 9. My parent, that never push me to do something, and always blind-trust me☺.
- 10. My sister, Yin, my brother, Jiang, and all of the cousins in my very big family. Thank you, thank you, and thank you.
- 11. Other parties that can't be mentioned in this report that has helped the author (directly or indirectly).
- 12. Again, for S.J. that was, is, will be, and always be there. Thank you for 10, 7, and 4 years ago. Thank you for these recent months. Thank you for the days in the future when I come to you.

The author would like to accept any critics and suggestions for this thesis. The Author hopes that it can give any advantages to the reader. Thank you.

ABSTRACT

The scheduling plan at Stamping Tools Division P.T. Mekar Armada Jaya has some problems. The schedule plan created cannot be finished the demand in time. It happens because they schedule an item that has not been finished yet. The result of this condition is items cannot be processed and must wait until the previous operation has finished. Those makes the makespan increases and the item cannot be processed as scheduled.

This thesis is made to solve the problem in the schedule plan. The program is developed using Microsoft Excel 2007 and Visual Basic for Application based on Schedule Geration. There are 3 priority rules can be chosen in the program. Using the program, schedule plan can be generated in a short time, automatically, and with minimum errors.

From the result, the program can solve all the problems in the previous schedule plan. Also, in the given period of time, MWKR is the best priority rules for Stamping Tools Division P.T. Mekar Armada Jaya.

Keyword: Schedule, Scheduling, Makespan, Schedule Generation.
