

BAB 6

KESIMPULAN DAN SARAN

6.1. Kesimpulan

Kesimpulan yang dapat diperoleh berdasarkan analisis data antara lain:

- a. Unit *material handling* di bagian *bag go down* dan *bulk go down* yang melayani pengiriman material ke produksi, yaitu dua unit *forklift*, satu unit *loader* besar, dan dua unit *loader* kecil, tidak mampu menangani permintaan bahan baku dalam skenario maksimum atau kondisi "terburuk" tetapi masih mampu menangani permintaan dalam skenario atau kondisi rata-rata. Hal ini ditunjukkan oleh nilai utilitas unit *material handling* yang berada di atas 100% pada skenario maksimum, sedangkan utilitas pada skenario rata-rata lebih kecil daripada 100%. Nilai utilitas unit *material handling* untuk frekuensi maksimum yang pernah terjadi dan skenario rata-rata berada di bawah 100% yang mengindikasikan bahwa keterlambatan pengiriman bahan baku tidak disebabkan oleh utilitas *material handling*. Perlu diadakan penelitian lebih lanjut untuk menganalisis penyebab keterlambatan pengiriman bahan baku ini.
- b. Usulan lokasi penyimpanan material *bag* di gudang *bag go down* yang memberikan jarak minimum ke *intake* dilakukan dengan langkah-langkah pada Gambar 1.2. sedangkan hasilnya dapat dilihat pada Tabel 5.19.

6.2. Saran

Saran yang dapat diberikan kepada PT Charoen Pokphand Indonesia Feedmill Balaraja sebagai berikut :

- a. Penentuan penempatan material yang tetap di gudang *bag go down* dengan mempertimbangkan jarak ke titik *intake* dan karakteristik material untuk mengoptimalkan utilitas unit *material handling*. Langkah-langkah usulan pada Gambar 1.2. dapat digunakan terkait dengan saran ini, tetapi masih perlu diteliti lebih lanjut dengan mempertimbangkan aspek karakteristik material dan jumlah rata-rata tiap jenis material.
- b. Standarisasi penjadwalan pengiriman material yang dilakukan oleh bagian *raw material preparation* untuk mengantisipasi tidak meratanya beban kerja unit *material handling* dalam waktu tertentu. Penelitian mengenai penjadwalan dapat dilakukan terkait dengan usulan ini.
