

BAB V

PENUTUP

5.1 Kesimpulan

Penelitian ini bertujuan untuk menguji pengaruh rasio keuangan yang diproksikan Intensitas Iklan (AI), Proporsi Gaji (PS), dan Perputaran Hutang (APT) terhadap hubungan antara *corporate social responsibility disclosure* yang diproksikan Perlindungan Pelanggan (CUSP), Perlindungan Karyawan (STP), dan Perlindungan Pemasok (DP) dan nilai perusahaan yang diproksikan *Tobins'q*. Berdasarkan pembahasan hasil dapat ditarik kesimpulan sebagai berikut:

- 1) Intensitas iklan (AI) tidak memperkuat pengaruh CSR *disclosure* (pengungkapan perlindungan pelanggan) terhadap nilai perusahaan.
- 2) Proporsi gaji (PS) tidak memperkuat pengaruh CSR *disclosure* (pengungkapan perlindungan karyawan) terhadap nilai perusahaan.
- 3) Perputaran hutang (APT) tidak memperkuat pengaruh CSR *disclosure* (pengungkapan perlindungan pemasok) terhadap nilai perusahaan.

5.2 Keterbatasan

Keterbatasan dalam penelitian ini adalah kurangnya data beban iklan dan pembelian dari pemasok (*supplier*) sehingga jumlah sampel yang digunakan tidak banyak. Keterbatasan lainnya adalah sulitnya menentukan pengungkapan perlindungan pemasok karena pengungkapan perlindungan pemasok tidak

termasuk kedalam pengungkapan CSR melainkan tata kelola perusahaan. Hal ini yang menyebabkan tidak banyak perusahaan yang mengungkapkan perlindungan terhadap pemasoknya.

5.3 Saran

Saran untuk peneliti berikutnya adalah yang pertama, memperluas sektor penelitian untuk menghindari jumlah sampel yang sedikit akibat tidak tersedianya data mengenai beban iklan dan pembelian kepada *supplier*. Kedua, menentukan kriteria untuk masing-masing pengungkapan perlindungan (CSR disclosure) agar tidak terjadi subjektivitas penilaian CSR disclosure untuk masing-masing *stakeholders*.
