

CHAPTER V

CONCLUSION

This chapter discuss the conclusion and also managerial implication of this research. The limitation of this research is also discussed in this chapter and some suggestions by researcher for PT. Dharma Lautan Utama is also discussed in this chapter. Suggestion for future research will end this chapter.

5.1 Conclusion

Several finding can be concluded, based on the research analysis that has been conducted:

1. Based on the result of t-test analysis, meaningful work has a significant and positive effect on the organizational commitment of employees in PT. Dharma Lautan Utama. Hence, first hypothesis in this research is supported.
2. Based on the result of t-test analysis, sense of community in the workplace has a positive effect on the organizational commitment of employees in PT. Dharma Lautan Utama. Hence, second hypothesis in this research is supported.
3. Based on the result of t-test analysis alignment with organizational values has a positive effect on the organizational commitment of employees in PT. Dharma Lautan Utama. Hence, third hypothesis in this research is supported.

5.2 Managerial Implication

Managing human resource is important within an organization. Employees is the key to success for organization, and in order to remain competitive PT. Dharma Lautan Utama needs to make sure that their employees are committed to the organization. PT. Dharma Lautan Utama needs to understand and support factor-factors that affect organizational commitment of employees such as work spirituality. This research is useful for PT. Dharma Lautan Utama regarding the impact of dimensions of work spirituality on organizational commitment of their employees.

Work spirituality have a significant and positive impacts on organizational commitment of PT. Dharma Lautan Utama Surabaya, despitess differences in values or belief backgrounds. The reason for this is because work spirituality is about employee relation with co-workers, meaning or purpose of their job, and personal values align with organizational values. While work spirituality is about relation with God.

The findings of this research showed that sense of community has the biggest impact on organizational commitment, followed by alignment of values, and meaningful work. Out of these three dimensions, the mean of meaningful work is the lowest with 4,81. Both sense of community and alignment of values have the same mean with 4,84. This thing implied that employees of PT. Dharma Lautan Utama Surabaya experience a lower level of meaningful work compared to sense of community and alignment of values.

Employees feel moderate that their spirit is energized by work and work is connected to what they think is important in life. In order to improve the meaningful work of employees, PT. Dharma Lautan Utama can use job crafting. Through task crafting, relationship crafting, and cognitive crafting. Job crafting is chosen, because it gives employees opportunities to redefine and imagine their job designs in a more personal way.

PT. Dharma Lautan Utama Surabaya can implement job crafting, by giving employees opportunities to give input to supervisors regarding the way to do their jobs. Another way to implement job crafting in the office is by changing the mindsets about the tasks that employees do. By changing perspectives on what they are doing, employees can find or create more meaning of their jobs. The example of this is for the cleaning service, by changing the mindsets from just cleaning into making customers journeys more comfortable and memorable. It can give them more meaning as they are giving contribution to the others and not just about cleaning.

PT. Dharma Lautan Utama employees, think that employees are linked to a common purpose moderately. In order to improve this, PT. Dharma Lautan Utama can add more regular social events, such as volunteering opportunities for employees where employees with the same vision can work together and feel connected through a sense of shared achievement. It will increase the chemistry, communication, and sense of belonging to employees. At the same time, it can improve alignment of values and meaningful work dimensions of work spirituality.

Lastly, PT. Dharma Lautan Utama can develop employees work spirituality by giving workshops and seminars about spirituality at the workplace. It can help employees to cope and enhance employees work spirituality and improve organizational commitment. In order to do this, PT. Dharma Lautan Utama needs to change the title of the workshop. Rather than using work spirituality as the title or topic, PT. Dharma Lautan Utama can use the dimensions of work spirituality as the topic. The reason for this is because, people tend to not join a workshop when the topic seems hard such as work spirituality. Hence, the example for the topic can be, "Find Purpose in Your Job and Life". This topic seems less hard and more interesting.

5.3 Research Limitation

Researcher realize that there are some limitations that can affect the result of the research. The limitations that are found by researcher are as follow:

1. This research is conducted only in PT. Dharma Lautan Utama Surabaya. hence the results of the research do not generally apply to other organizations.
2. In order to distribute the questionnaire, researcher gave the link of the questionnaire to human resource department so they can share it to employees. Indirect distribution of questionnaire may result in unqualified respondents. Besides that, researcher cannot make sure whether respondents understand the questions or not.

3. The questionnaire is distributed through online form which is Google Form. Hence, researcher do not have any control during the fulfilment process.
4. The number of samples used in this research was only 91. Small number of samples that were used in this research decreased the statistical power of this thesis. It decreased the reliability of this thesis.

5.4 Future Research

Based on the result of the research, there are several suggestions for future research:

1. If further research uses the same topic, the researcher can add other variables to see the influence work spirituality on other variables such as job performance.
2. Replication of this research in the future can be conducted on other types of company such as logistic, retail, small and medium enterprise, or multinational corporation. If future research also conducted in shipping company, researcher can use more than one sample, hence it can be used and compared with this research.
3. Data collection in the future can use additional method such as deep interview, to gain deeper analysis of the variables and research.
4. If future research uses similar topic, researcher can analyse the impact of work spirituality on different types of organizational commitment especially

affective commitment. As work spirituality works differently on different types of organizational commitment, with the higher effects on affective commitment Mohamed and Ruth (2016).

QUESTIONNAIRE

Yogyakarta, 23 April 2020

Bapak/Ibu yang terhormat.

Saya Yudi Kristianto, mahasiswa pada Fakultas Bisnis dan Ekonomika Universitas Atma Jaya Yogyakarta. Saat ini, saya sedang melakukan penelitian untuk penyusunan skripsi dengan dosen pembimbing M. Parnawa Putranta, MBA., PhD. Secara umum, penelitian ini bertujuan untuk membahas pengaruh spiritualitas kerja terhadap komitmen karyawan di PT. Dharma Lautan Utama Surabaya. Perlu dipahami, kalau spiritualitas kerja berbeda dari spiritualitas pada agama. Spiritualitas pada agama merupakan sebuah kepercayaan, sedangkan spiritualitas kerja merupakan sebuah hubungan pada rekan dan komunitas.

Bapak/Ibu dipilih sebagai calon responden karena penelitian ini sangat memerlukan informasi dari Bapak/Ibu sebagai karyawan di PT. Dharma Lautan Utama. Oleh karena itu, dengan ini saya mohon bantuan Bapak/Ibu untuk meluangkan waktu bagi saya guna menjawab serangkaian pertanyaan yang terdapat di dalam kuesioner ini. Kemudian, setelah kuesioner ini terisi lengkap, Bapak/Ibu dimohon untuk menyerahkan kepada saya.

Perlu diketahui, penelitian ini sudah mendapat izin dari pimpinan institusi tempat Bapak/Ibu bekerja. Semua pertanyaan yang berkaitan dengan hal tersebut, dapat dialamatkan kepada email peneliti di bawah ini.

Terima kasih atas perhatian Bapak/Ibu.

Hormat Saya,

Yudi Kristianto
