

BAB VI

KESIMPULAN DAN SARAN

6.1 Kesimpulan

Beberapa kesimpulan yang dapat ditarik dari hasil perancangan sistem informasi untuk menyusun penjadwalan dari suatu proyek dengan menggunakan bahasa komputer JAVA adalah sebagai berikut :

1. Hasil validasi program Anggaran Biaya Konstruksi khususnya pada Kurva S dan *Bar-Charts* menunjukkan tidak ada perbedaan antara perhitungan menggunakan Microsoft Excel dengan program Anggaran Biaya Konstruksi, artinya program ini valid untuk digunakan dalam membantu menghitung anggaran biaya dan penjadwalan konstruksi suatu proyek
2. Kurva S dan *Bar-Charts* yang dihasilkan dapat disimpan dalam bentuk *PNG*
3. Kurva S dan *Bar-Charts* yang dihasilkan dapat diperbesar dan diperkecil sehingga bisa mempermudah *user* dalam membaca data yang dihasilkan
4. Kurva S dan *Bar-Charts* dapat dicetak sampai dengan ukuran A3 bila *printer* yang digunakan mendukung untuk itu.

6.2 Saran

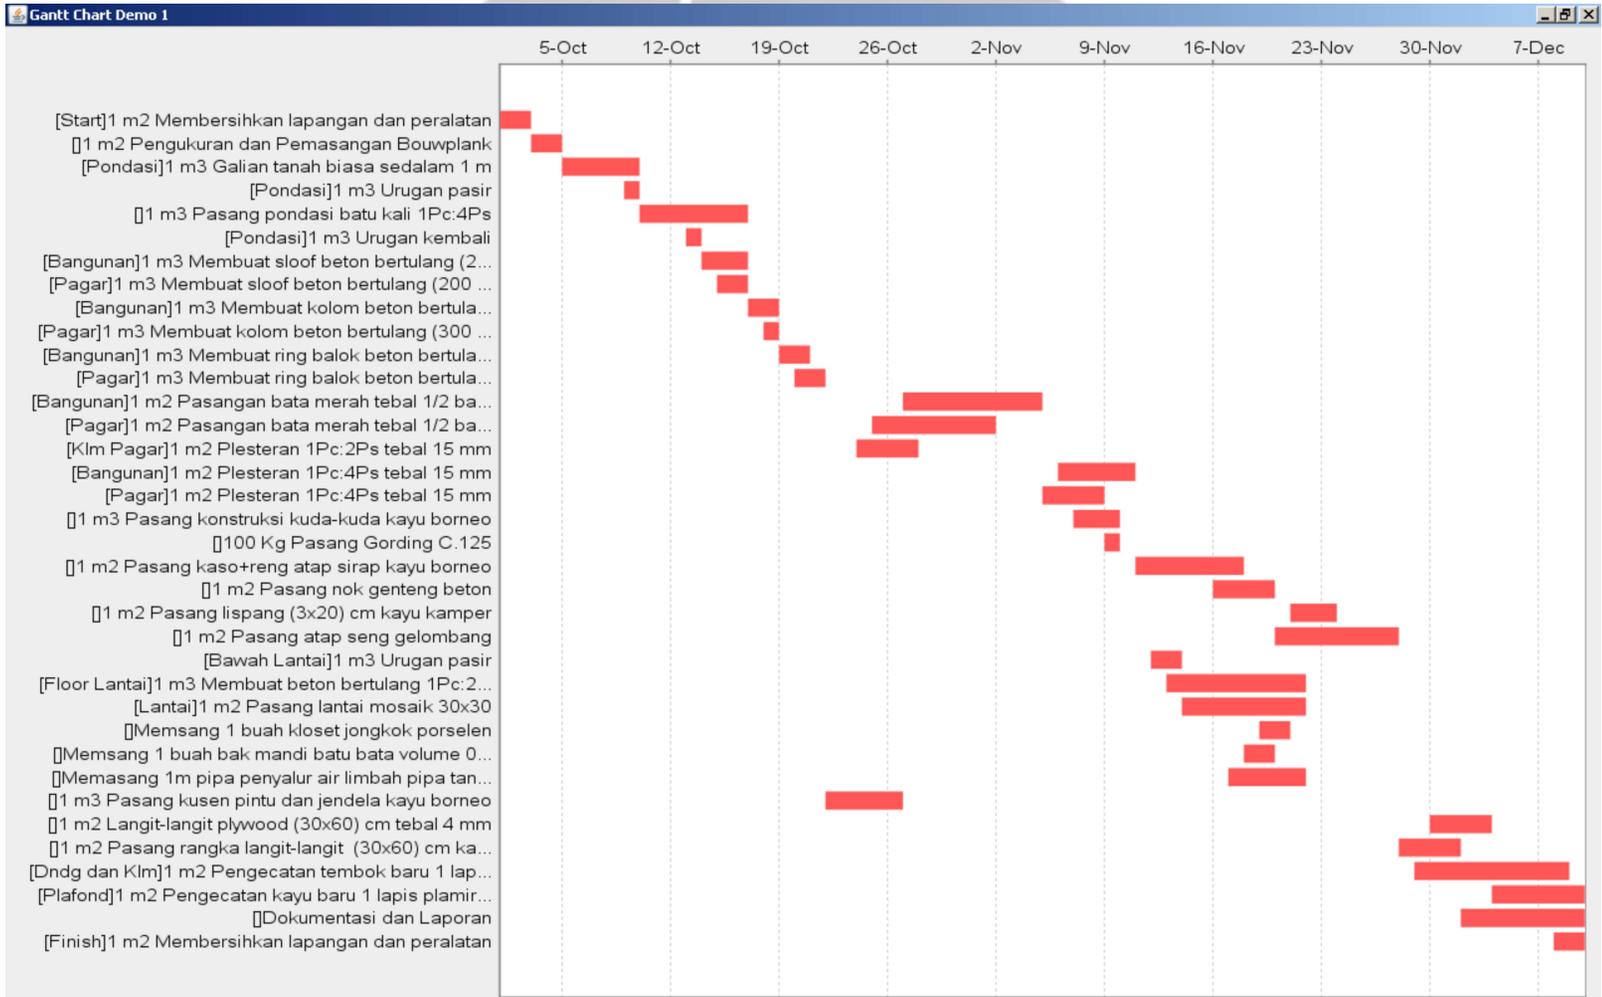

Dari beberapa kelebihan fitur penjadwalan pada program Anggaran Biaya Konstruksi yang disebutkan pada kesimpulan di atas, masih terdapat beberapa kekurangan, antara lain:

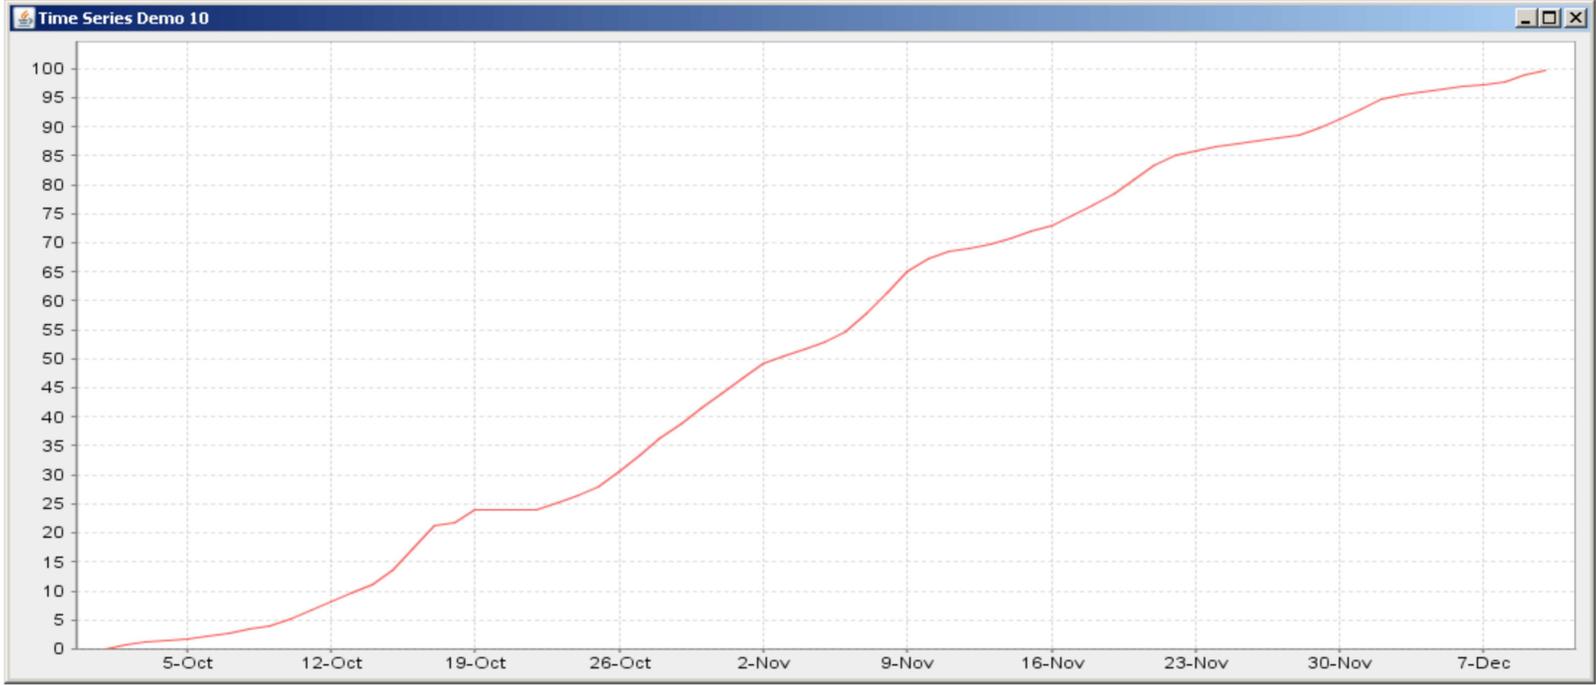

1. Penjadwalan pada program Anggaran Biaya Konstruksi tidak hanya dapat disusun dengan asumsi hari minggu tetap dihitung sebagai hari kerja, dan tidak ada hari libur.
2. Penjadwalan pada program Anggaran Biaya Konstruksi menghasilkan Kurva S dan *Bar-Charts* pada *form* masing-masing.
