BAB V

PENUTUP

5.1   Kesimpulan

Hasil penelitian ini telah berhasil dalam mencapai tujuan penelitian untuk mengetahui faktor – faktor yang secara kuat mempengaruhi niat berkelanjutan untuk terus menggunakan platform pembelajaran online oleh mahasiswa Universitas Nusa Nipa Maumere. Model penelitian ini disusun berdasarkan teori penerimaan teknologi UTAUT2 yang telah berhasil menjelaskan niat penggunaan berkelanjutan pembelajaran online oleh mahasiswa pada Universitas Nusa Nipa Maumere.

Berdasarkan penelitian yang dilakukan dapat disimpulkan bahwa konstruk habit merupakan faktor yang paling kuat mempengaruhi niat berkelanjutan untuk menggunakan pembelajaran online oleh mahasiswa di Universitas Nusa Nipa Maumere. Faktor terkuat kedua yang mempengaruhi niat berkelanjutan untuk menggunakan pembelajaran online oleh mahasiswa adalah *lecturer interaction*. Faktor *performance expectancy*, *effort expectancy, social influence, facilitating conditions* dan *self efficacy* tidak mempengaruhi niat berkelanjutan untuk menggunakan pembelajaran online oleh mahasiswa. Mahasiswa pada Universitas Nusa Nipa Maumere memiliki niat berkelanjutan untuk menggunakan pembelajaran online karena kebiasaan dalam menggunakan teknologi dan interaksi yang diberikan oleh dosen dalam proses belajar mengajar, bukan karena pengaruh performa sistem yang

diharapkan, kemudahan sistem yang diharapkan, pengaruh sosial yang diberikan, kondisi fasilitas yang ada, dan kemampuan mahasiswa dalam menggunakan teknologi pembelajaran online. Selain itu juga untuk analisis moderating, hasil menunjukan *age*, *gender*, dan *major* tidak berpengaruh signifikan terhadap faktor *performance expectancy*, *effort expectancy, social influence, facilitating conditions, habit, self efficacy* dan *lecturer interaction* untuk terus menggunakan pembelajaran online secara berkelanjutan. Hal ini menunjukan bahwa platform pembelajaran online merupakan teknologi yang penerapan dan penggunaannya masih baru dan bersifat wajib dimasa pandemi covid-19. Hal ini menyebabkan sikap responden terhadap platform ini cenderung serupa untuk semua tingkat usia, jenis kelamin, dan jurusan.

5.2 Keterbatasan Penelitian dan Saran

Penelitian ini hanya meneliti niat penggunaan berkelanjutan platform pembelajaran online dari mahasiswa sedangkan pengguna platform pembelajaran online bukan hanya oleh mahasiswa melainkan juga digunakan oleh dosen sebagai pemberi dan penyedia materi perkuliahan. Untuk penelitian selanjutnya disarankan untuk melakukan penelitian niat penggunaan berkelanjutan pembelajaran online oleh dosen. Selain itu juga penelitian ini hanya terfokus pada mahasiswa dari angkatan 2019 – 2021. Untuk penelitian selanjutnya disarankan untuk melakukan penelitian untuk semua mahasiswa UNIPA. Penelitian ini juga hanya berlaku selama masa pandemi covid-19. Diharapkan penelitian selanjutnya untuk melakukan penelitian setelah pandemi ini berakhir dengan menggunakan semua variabel

yang terdapat pada model UTAUT2. Sehingga menjadi sebuah temuan dengan hasil yang lebih akurat dari penelitian di masa pandemi covid-19. Hal ini dapat berguna untuk melengkapi hasil penelitian ini sehingga semakin dapat meningkatkan niat penggunaan berkelanjutan yang diharapkan akan meningkatkan penggunaan platform pembelajaran online.
