

CHAPTER V CONCLUSION

5.1. Conclusion

The following are the primary conclusions that can be derived from the data findings and discussion presented in the previous chapter:

5.1.1. Based on the Analysis of the Respondent's Characteristic

1. There are 220 respondents who eligible with the criteria; the customer age minimum 17 years old & owned and used Gopay at least once in the last year.
2. Based on characteristic of gender, the majority of the respondents are female (123 respondents) and male (97 respondents).
3. Based on characteristic of age, most of the respondents are people aged >30 years old (171 respondents).
4. Based on the characteristic of last education, most respondents have a bachelor's degree (120 respondents).
5. Based on the characteristic of job, most respondents work as a private employee (77 respondents).
6. Based on the characteristic of salary, most respondents have income >Rp. 5.001.000 (134 respondents).

5.1.2. Based on the result of PLS-SEM

1. H1 technical quality will have a positive impact towards attitudinal customer loyalty (H1 rejected). Based on these results, this means that there is no significant effect of technical quality to attitudinal customer loyalty.
2. H4 technical quality will have a positive impact towards behavioral customer loyalty (H4 rejected). Based on these results, this means that there is no significant effect of technical quality to behavioral customer loyalty.

3. H2 functional quality will have a positive impact towards attitudinal customer loyalty (H2 Rejected). Based on these results, this means that there is no significant effect of functional quality towards attitudinal customer loyalty

4. H5 functional quality will have a positive impact towards behavioral customer loyalty (rejected). Based on these results, this means that there is no significant effect of functional quality towards behavioral customer loyalty.

5. H3 reputational quality will have a positive impact towards attitudinal customer loyalty (accepted). Based on these results, this means that there is a significant effect of functional quality towards attitudinal customer loyalty.

6. H6 reputational quality will have a positive impact towards behavioral customer loyalty (H6 accepted). Based on these results, this means that there is a significant effect of functional quality towards behavioral customer loyalty.

5.2. Managerial Implications

The findings of this study have scientific value as they provide valuable insights for managerial decision-making and the development of marketing strategies, which are crucial for GoPay and other e-wallet services.

1. On this research two out of six hypothesis are accepted, which is reputational quality affect attitudinal customer loyalty and behavioral customer loyalty. This means that GoPay have a good reputation and become a successful service in the society. From the image that GoPay create in the society, people are interested to recommend GoPay to others and many people that interested to try after that it become a behavior to use GoPay as their transaction at the end become a loyal customer. GoPay should maintain its reputation in society so Gopay not lose to their other e-wallet competitors.

2. The service provider (GoPay) must work on technical and functional part of the service because from this research, technical quality and functional quality have an insignificant affect to the attitudinal and behavioral customer loyalty. GoPay should

consider their marketing strategies following customer recommendations about their services (technical quality and functional quality). For examples by reading reviews on the Google Play Store and the App Store, such as what matters regarding functional quality and technical quality issues that make their rating bad. From this, GoPay can slowly improve its technical quality and functional quality so that it can influence a person's attitude and behavior so that they become loyal customers.

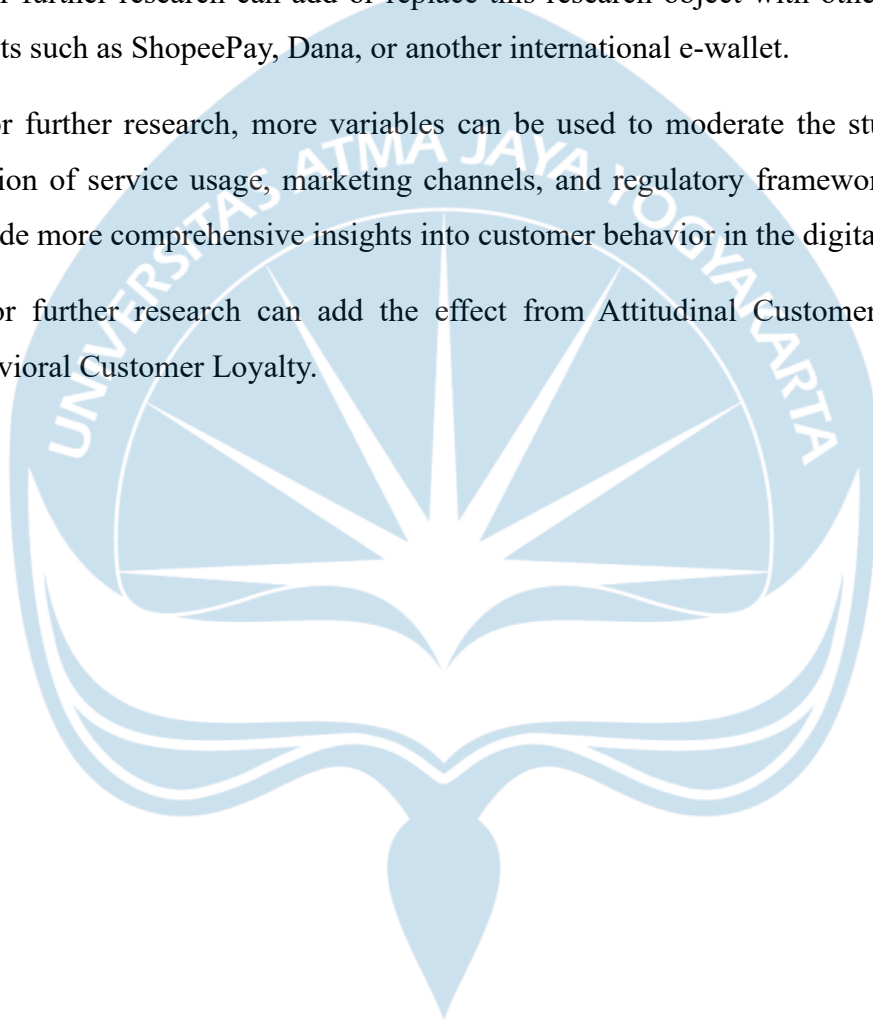

3. For the consumer they can see data regarding the GoPay e-wallet which by look at the data it can be a reference for e-wallet users to determine which service provider is more suitable for them or which one is better for them to use for daily transactions.

5.3. Research Limitation

1. In the respondent's criteria, the second criteria are only used Gopay at least once in the last year, this is a weakness of this research because it should be more than 3 or 5 in the last year
2. The research carried out was only limited to Indonesia because the object used was e-wallet which is mostly used by Indonesian citizens.
3. The e-wallet used is only GoPay which might give different results if you use other e-wallets or various types of e-wallets in the research.
4. The variables used in this research are limited, which makes it possible to produce different results if other variables are added.
5. Even though this research is using Theory Planned Behavior, this research hasn't investigated the effect from Attitudinal Customer Loyalty to Behavioral Customer Loyalty.

5.4. Suggestion For Future Research

1. For further research, can implement this research in other countries that use e-wallets for daily transaction.
2. For further research can add or replace this research object with other existing e-wallets such as ShopeePay, Dana, or another international e-wallet.
3. For further research, more variables can be used to moderate the study, such as duration of service usage, marketing channels, and regulatory framework. This will provide more comprehensive insights into customer behavior in the digital era.
4. For further research can add the effect from Attitudinal Customer Loyalty to Behavioral Customer Loyalty.

PENGARUH KUALITAS PELAYANAN TERHADAP LOYALITAS PELANGGAN GOPAY

B I U  

Halo semuanya,

Perkenalkan, saya Stanislaus Bagus Satriyoaji, mahasiswa Universitas Atmajaya Yogyakarta, Program Studi S1 Manajemen Internasional.

Dalam rangka menyelesaikan tugas akhir skripsi sebagai syarat kelulusan, saya sedang mengadakan penelitian dengan topik "Pengaruh Kualitas Pelayanan Terhadap Loyalitas Pelanggan GoPay". Pada survey ini, saya memerlukan responden dengan kriteria sebagai berikut:

1. Berumur minimal 17 tahun.
2. Memiliki dan menggunakan Gopay minimal satu kali dalam setahun terakhir

Jika ada pertanyaan mengenai isi dari survey ini maupun penelitian secara keseluruhan, anda bisa menghubungi saya melalui informasi kontak dibawah ini:

-  +31687602912 (Whatsapp)
-  +6282116172769 (Nomor Telepon)

Terima kasih atas ketersediaan anda dalam mengisi kuesioner ini.
