KESIMPULAN DAN SARAN

5.1. Kesimpulan

Penelitian ini bertujuan untuk mengetahui bagaimana pengaruh skeptisisme profesional, penguasaan teknologi informasi dan persepsi etika terhadap kualitas audit jarak jauh (*remote audit*). Sebanyak 157 responden dalam penelitian adalah auditor eksteral dari Kantor Akuntan Publik di wilayah Jakarta. Berikut ini adalah beberapa kesimpulan yang dapat dibuat berdasarkan hasil analisis dan pembahasan:

1. Skeptisisme Profesional berpengaruh positif terhadap kualitas audit jarak jauh. Hal tersebut dikarenakan skeptisisme profesional membuat auditor selalu mempertimbangkan segala hal dan berpikir kritis terhadap keabsahan bukti audit, oleh karena itu risiko salah saji saat melakukan pekerjaan audit jarak jauh dapat dikurangi dan pada akhirnya audit jarak jauh yang berkualitas dapat dicapai.
2. Penguasaan Teknologi Informasi berpengaruh positif terhadap kualitas audit jarak jauh. Hal tersebut dikarenakan dengan menguasai teknologi informasi yang menjadi satu-satunya media dalam bertukar informasi saat melakukan audit jarak jauh, auditor dapat melakukan pekerjaannya dengan baik sehingga menghasilkan kualitas audit jarak jauh yang baik.
3. Persepsi Etika berpengaruh positif terhadap kualitas audit jarak jauh. Hal tersebut dikarenakan etika yang kuat pada auditor membangun dasar untuk audit yang handal, dan memastikan bahwa audit tersebut benar-benar mencerminkan situasi keuangan entitas yang diaudit sehingga

menghasilkan audit jarak jauh yang berkualitas.

5.2 Implikasi Penelitian

Diharapkan hasil penelitian ini dapat memberikan manfaat bagi auditor eksternal dan Kantor Akuntan Publik dalam memperoleh audit berkualitas tinggi dan dapat digunakan sebagai dasar pertimbangan dalam pengambilan keputusan dalam melakukan *remote audit*. Pada penelitian ini memberikan hasil bahwa skeptisme profesional berpengaruh positif terhadap kualitas audit jarak jauh. Hal ini berarti bahwa sikap skeptis atau tidak mudah percaya dan berpikir kritis yang dimiliki auditor dapat meminimalisir terjadinya kesalahan maupun kecurangan sehingga menunjang kualitas audit jarak jauh yang dihasilkan semakin baik. Hal ini dapat menjadi pertimbangan bagi klien dan investor dalam memilih auditor eksternal yang memiliki sikap skeptisme profesional yang tinggi karena adanya sikap skeptis memungkinkan auditor lebih efektif dalam mengidentifikasi kesalahan dan kecurangan, sehingga meningkatkan kualitas audit yang dihasilkan.

Hasil selanjutnya yaitu penguasaan teknologi informasi berpengaruh positif terhadap kualitas audit jarak jauh. Hal ini berarti bahwa dengan menguasai, memahami, dan andal menggunakan teknologi informasi yang menjadi alat dalam melalukan audit jarak jauh, auditor dapat dengan mudah melakukan pekerjaannya sehingga dapat menghasilkan audit yang berkualitas. Hal ini dapat menjadi pertimbangan bagi klien dan investor dalam memilih auditor eksternal yang menguasai teknologi informasi karena pekerjaannya akan lebih efektif dan efisien dalam melakukan audit jarak jauh, sehingga meningkatkan kualitas audit yang dihasilkan.

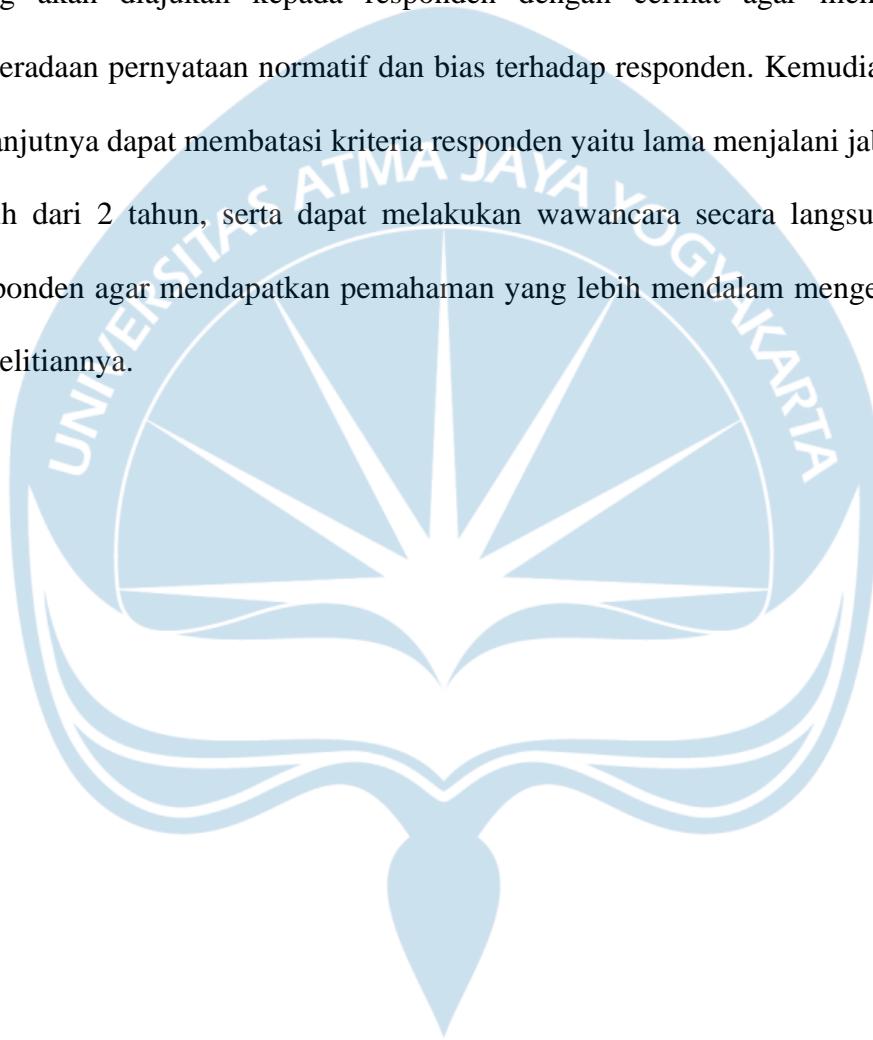

Hasil selanjutnya adalah persepsi etika berpengaruh positif terhadap kualitas audit jarak jauh. Hal ini berarti auditor eksternal profesional dalam menjalankan tugasnya memiliki pedoman-pedoman yang mengikat seperti kode etik dalam hal ini adalah Kode Etik Profesi Akuntan Publik 2021 (IAPI, 2021) sehingga dalam menjalankan tugasnya, auditor memiliki panduan yang jelas dan mampu memberikan keputusan yang tepat serta dapat dipertanggung jawabkan kepada pihak yang membutuhkan. Hal ini dapat menjadi pertimbangan bagi klien dan investor dalam memilih auditor eksternal yang menerapkan pedoman persepsi etika dengan baik agar kualitas audit jarak jauh yang andal dapat tercapai.

5.3. Keterbatasan Penelitian

Peneliti menyadari adanya keterbatasan dalam penelitian ini. keterbatasan itu yaitu beberapa butir pernyataan dari kuesioner masih bersifat normatif, sehingga memungkinkan menyebabkan bias terhadap hubungan variabel independen dan variabel dependen. Dalam proses penyebaran kuesionernya peneliti melakukan hanya secara online menggunakan *google form*, dan metode pemilihan sampel menggunakan *convenience sampling* dimana sampel penelitian dipilih berdasarkan siapa saja yang sesuai dengan kriteria utama yaitu auditor eksternal yang bekerja pada KAP di Jakarta sehingga dapat meningkatkan risiko bias responden karena tidak semua auditor eksternal pada semua jabatan melakukan audit jarak jauh sehingga ada beberapa auditor yang kurang sesuai untuk menjadi responden pada penelitian ini.

5.4. Saran

Berdasarkan keterbatasan yang ditemui dalam penelitian ini, peneliti memiliki beberapa saran yang dapat dipertimbangkan oleh peneliti selanjutnya yaitu untuk penelitian berikutnya, disarankan untuk melihat kembali pernyataan yang akan diajukan kepada responden dengan cermat agar meminimalkan keberadaan pernyataan normatif dan bias terhadap responden. Kemudian, peneliti selanjutnya dapat membatasi kriteria responden yaitu lama menjalani jabatan yaitu lebih dari 2 tahun, serta dapat melakukan wawancara secara langsung kepada responden agar mendapatkan pemahaman yang lebih mendalam mengenai subjek penelitiannya.

KUESIONER PENELITIAN

Kepada Yth. Bapak/Ibu/Saudara/Saudari Responden Di tempat

Perkenalkan saya mahasiswa Universitas Atma Jaya Yogyakarta yang sedang melakukan penelitian tentang **“PENGARUH SKEPTISISME PROFESIONAL, PENGUASAAN TEKNOLOGI INFORMASI DAN PERSEPSI ETIKA TERHADAP KUALITAS AUDIT JARAK JAUH (*REMOTE AUDIT*) PADA KANTOR AKUNTAN PUBLIK DI JAKARTA”**

Saya selaku peneliti meminta kesediaan Bapak/Ibu/Saudara/i untuk membantu penelitian ini dengan mengisi kuesioner. Berikut kuesioner yang saya ajukan, mohon kepada Bapak/Ibu/Saudara/i untuk memberikan jawaban yang sejujur-jujurnya dan sesuai dengan keadaan yang sebenarnya. Adapun jawaban yang Bapak/Ibu/Saudara/i berikan tidak akan berpengaruh pada diri Bapak/Ibu/Saudara/i karena penelitian ini dilakukan semata-mata untuk pengembangan ilmu pengetahuan. Atas kesediaannya saya ucapan terima kasih.

Hormat saya,

Andini Rambu Kareri
