

## **BAB V**

### **KESIMPULAN DAN SARAN**

#### **5.1 Kesimpulan**

Penelitian ini bertujuan untuk mengembangkan *front-end* sebagai salah satu bagian dalam tahap pengembangan IMS berbasis web yang membantu pengelolaan inventori dan penjualan. *Front-end* IMS dikembangkan dengan melalui tahap identifikasi masalah, prototyping yang mencakup tahap komunikasi, perencanaan dan pemodelan, pengembangan prototipe, serta implementasi dan evaluasi. Prototyping dijalankan sebanyak tiga iterasi yang masing – masing iterasi berhasil lolos pengujian dan diterima oleh pengguna akhir. Dengan demikian, *front-end* sebagai salah satu bagian dalam tahap pengembangan IMS berbasis web pada pengelolaan inventori dan penjualan telah berhasil dikembangkan.

#### **5.2 Saran**

Berdasarkan penelitian yang telah dijalankan, terdapat rekomendasi yang dapat dijadikan acuan dalam rangka pengembangan IMS Lori lebih jauh.

1. Terdapat pengembangan dengan fokus pada integrasi *back-end* dan migrasi data asli aktivitas Lori yang terlewatkan sebelum sistem dibangun.
2. Penelitian yang berfokus pada pengukuran efektivitas dan efisiensi penggunaan IMS Lori dalam membantu aktivitas inventori dan penjualan.
3. Aktivitas pelaporan IMS Lori saat ini masih hanya mendukung dalam fungsi bisnis penjualan. Diharapkan terdapat penelitian yang fokus dalam pengembangan beranda dan laporan untuk berbagai fungsi bisnis yang ada pada Lori.
