

BAB V

PENUTUP

Penelitian yang dikembangkan dari telaah teoritik dan temuan empirik terdahulu dengan hasil yang mampu menjelaskan variabel-variabel yang mempengaruhi struktur modal, dalam bab terakhir ini dirangkum menjadi kesimpulan, implikasi manajerial, keterbatasan, dan saran.

5.1 Keimpulan

Berdasarkan hasil dalam penelitian ini, dapat disimpulkan beberapa hal untuk menjawab rumusan masalah dan sekaligus untuk membuktikan hipotesis sebagai berikut: struktur modal secara serentak hanya dipengaruhi oleh likuiditas dengan indikator *net working capital to total assets ratio*, tingkat pertumbuhan perusahaan, struktur aktiva, dan profitabilitas dengan indikator ROA (*return on assets*). Sedangkan yang tidak berpengaruh adalah ukuran perusahaan.

5.2 Implikasi Manajerial

Implikasi manajerial dari penelitian ini adalah DR (*debt ratio*) merupakan indikator *leverage* atau struktur modal. Dengan kemampuan perusahaan untuk meraih profitabilitas yang tinggi maka dapat menghasilkan dana internal yang besar pula. Sehingga perusahaan akan menjadi semakin likuid. Dari sumber internal tersebut perusahaan dapat mengembangkan

kegiatan usahanya. Perusahaan juga dapat memperkuat struktur aktiva sehingga pada akhirnya perusahaan dapat tumbuh dengan dana internal (ekuitas). Perusahaan yang lebih besar ekuitasnya maka porsi utangnya akan semakin kecil.

5.3 Keterbatasan Penelitian

1. Data yang digunakan dalam penelitian ini adalah data laporan keuangan perusahaan manufaktur *go public* selama tahun 2009-2011. Oleh karena itu, hasil penelitian ini belum tentu dapat digeneralisasi untuk jenis perusahaan yang lain, atau periode waktu yang lain.
2. Periode penelitian yang cukup singkat yaitu selama 3 tahun karena adanya krisis global pada tahun 2007 dan 2008, sedangkan keputusan pendanaan adalah untuk jangka panjang sehingga memerlukan periode penelitian yang lebih lama lagi.
3. Penelitian ini membatasi pada pengungkapan variabel-variabel yang terkait dengan kondisi keuangan dan hasil usaha perusahaan. Meskipun hasil yang diperoleh mampu menjelaskan variabel-variabel yang mempengaruhi struktur modal, masih perlu diungkapkan variabel-variabel lain di luar kondisi keuangan dan hasil usaha perusahaan. Oleh karena itu untuk penelitian selanjutnya, akan lebih baik bila penelitian tersebut nantinya dapat mengungkapkan variabel-variabel lain di luar kondisi keuangan dan hasil usaha perusahaan.

5.4 Saran

a. Bagi manajer perusahaan manufaktur *go public*

Hasil penelitian ini mengungkapkan bahwa struktur modal dipengaruhi oleh likuiditas, tingkat pertumbuhan perusahaan, struktur aktiva, dan profitabilitas. Jadi, agar perusahaan dapat tetap *survive*, dalam menentukan struktur modal sebaiknya memperhatikan likuiditas, tingkat pertumbuhan perusahaan, struktur aktiva, dan profitabilitas.

Hasil penelitian ini menunjukkan secara empiris bahwa likuiditas merupakan variabel yang paling dominan dalam menentukan keputusan struktur modal yang dilakukan oleh manajer. Oleh karena itu, disarankan kepada manajer supaya dapat secara baik memanfaatkan tingkat likuiditas sebagai salah satu sumber dana internal perusahaan. Dengan adanya tambahan sumber dana internal tersebut, maka kebutuhan dana perusahaan dapat tercukupi dan sumber dana eksternal diharapkan dapat berkurang.

b. Bagi akademisi (peneliti lain)

Penelitian ini menunjukkan bahwa dalam penentuan struktur modal tidak hanya didasarkan pada pendekatan salah satu teori saja, melainkan gabungan dari beberapa teori, maka untuk penelitian selanjutnya diharapkan menggunakan berbagai pendekatan teori dan melakukan penambahan beberapa variabel baru yang secara teoritis dapat mempengaruhi keputusan struktur modal. Selain itu lebih memperpanjang lagi periode penelitiannya sehingga hasil akan lebih konsisten.
