

BAB V

KESIMPULAN DAN SARAN

V.1. KESIMPULAN

Dari hasil analisis data, dapat disimpulkan bahwa setelah dilakukan pengujian single factor test terhadap faktor-faktor yang berpengaruh terhadap tingkat inventori, diperoleh hasil bahwa tidak semua faktor berpengaruh terhadap tingkat inventori pada *raw material*, *work in process* dan *finish goods*, kesimpulan dari hasil analisis data dapat dijabarkan sebagai berikut:

1. single factor test

Dari hasil analisis tersebut diketahui bahwa faktor baja berpengaruh signifikan terhadap semua inventori, baik *raw material*, *work in process* maupun *finish goods*. Faktor lainnya, untuk tingkat inventori *raw material*, besi hanya signifikan pada tingkat inventori *raw material* saja, tidak signifikan untuk tingkat inventori lainnya, hal ini berarti bahwa besi sangat berpengaruh pada persediaan bahan mentah, sedangkan tingkat perputaran bahan baku besi rendah, fungsinya tidak begitu penting dalam persediaan *work in process* dan *finish goods*. Sehingga pengaruhnya tidak signifikan pada kedua tingkat inventori pada persediaan *work in process* dan *finish goods*.

Demikian juga dengan faktor-faktor pada *process manufacturing*, yaitu proses pemanasan, pencetakan, pemotongan, penuangan dan mesin, tidak semuanya berpengaruh signifikan terhadap semua tingkat inventori, hanya beberapa saja yang signifikan terhadap salah satu tingkat inventori, yaitu: untuk proses pemanasan signifikan pada *raw material* dan *work in process*, tidak signifikan pada *finish goods* dan pencetakan signifikan pada *raw material* inventori, tidak signifikan pada *Work In Process* dan *Finish goods*. sedangkan pada proses pemotongan signifikan pada tingkat inventori *finish goods* sedangkan untuk proses mesin, signifikan pada tingkat inventori *work in process* saja.

2. Multiple regression

Multiple regression digunakan untuk membuktikan hipotesis dalam penenlitian ini.

setelah dilakukan regresi terhadap faktor-faktor yang signifikan terhadap tingkat inventori diperoleh hasil bahwa: tidak semua faktor yang semula signifikan dalam single faktor test tetap signifikan dalam multiple regresssion ini.

a. raw material inventori

Faktor-faktor yang berpengaruh dalam tingkatan inventori raw material adalah harga, baja, besi sedangkan proses cetak yang

semula signifikan menjadi tidak signifikan dalam multiple regression ini.

b. Work in process Inventori

Faktor-faktor yang berpengaruh pada tingkatan inventori work in process adalah baja, besi, dan mesin, sedangkan harga, dan proses pemanasan menjadi tidak signifikan setelah dilakukan multiple regression

c. Finish goods inventori

Faktor-faktor yang signifikan terhadap tingkat inventori finish goods adalah baja dan process pemotongan, sedangkan harga dan besi tidak signifikan atau menjadi tidak berpengaruh terhadap tingkat inventori finish goods setelah diuji multiple regression.

Dari hasil tersebut dapat disimpulkan bahwa hipotesis pertama yaitu *set up cost* berpengaruh terhadap tingkat inventori dapat **diterima** sedangkan hipotesis yang kedua bahwa *item cost* berpengaruh terhadap tingkat inventori **diterima**, dengan demikian maka kedua hipotesis dalam penelitian ini terbukti.

V.2. SARAN

Berdasar kesimpulan yang diperoleh, penulis memberikan saran yang dapat dijadikan bahan pertimbangan bagi perusahaan pengecoran logam CV. Baja Sakti dalam pengadaan persediaan:

1. Penentuan jumlah persediaan yang ekonomis adalah sangat baik dan efisien dalam perusahaan, maka penulis menyarankan agar CV.Baja Sakti dalam penentuan persediaan, meperhitungkan pembelian yang ekonomis dan berpengaruh signifikan terhadap setiap kegiatan yang ada dalam proses produksi, sampai dengan proses tersebut selesai.
2. perusahaan perlu memberikan pelatihan kepada karyawan yang terlibat dalam pengadaan bahan baku, sehingga setiap biaya yang keluar menjadi sangat efektif.

Surat Keterangan

Yang bertanda tangan dibawah ini, menerangkan bahwa mahasiswa
tersebut dibawah ini :

Nama : Sugiarto

No. Mahasiswa : 11102

Fakultas : Ekonomi

Jurusan : Manajemen

Universitas : Atma Jaya Yogyakarta

Benar-benar telah melakukan pengamatan / penelitian di CV. Baja Sakti
Klaten, dalam rangka penyusunan Skripsi. Demikian surat keterangan ini dibuat
untuk digunakan sebagaimana mestinya.

C.V. BAJA SAKTI
INDUSTRI PENGECORAN LOGAM

FACTORY : TEGALREJO KLATEN
OFFICE : JL. SIDOMUKTI 88 TELP. 4535
SURAKARTA
