

BAB VI

PENUTUP

6.1 Kesimpulan

Kesimpulan yang dapat diperoleh pada pengembangan sistem menggunakan metode inferensi Tsukamoto untuk permasalahan kuliner adalah sebagai berikut :

1. Pengambilan keputusan dengan metode inferensi Tsukamoto melalui tahap-tahap yang telah ditetapkan. Pertama proses fuzzifikasi untuk menghitung nilai fuzi terhadap masukan dan data basis data. Proses selanjutnya adalah perbandingan dalam aturan yang ada. Selanjutnya adalah pengambilan kesimpulan dengan cara membandingkan hasil dari masukan dengan basis data. Tujuan kuliner yang menjadi hasil kuliner adalah diurutkan berdasarkan rumah makan yang mempunyai nilai defuzifikasi terkecil dari masukan.
2. Aplikasi kuliner di kota Kupang dengan metode inferensi Tsukamoto ini berhasil dikembangkan dan dapat membantu *user* memperoleh informasi kuliner sesuai dengan kebutuhan yang diinginkan. Informasi yang diberikan adalah informasi rumah makan yang lengkap dengan harga dan gambar menunya serta lokasi yang terhubung dengan google maps.

6.2 Saran

Saran yang diberikan untuk pengembangan aplikasi kuliner di kota Kupang dengan metode inferensi Tsukamoto ini lebih lanjut adalah :

1. Memperluas lingkup masalah menjadi informasi kuliner di Nusa Tenggara Timur yang mencakup semua Kabupaten bukan hanya pada Kota Kupang.
2. Mengembangkan aplikasi ini dengan berbasis *Mobile* sehingga dapat di akses oleh *user* dimana saja dia berada.
