

BAB V

PENUTUP

5.1 Simpulan

Penelitian ini bertujuan untuk membuktikan efek moderasi pemegang saham pengendali terhadap pengaruh set kesempatan investasi pada manajemen laba. Hal ini didasari argumen *negative entrenchment effect* yang menyatakan bahwa pemegang saham pengendali tertarik melakukan tindakan ekspropriasi untuk memperoleh manfaat privat pada perusahaan bertumbuh sehingga meningkatkan manajemen laba yang dilakukan oleh manajer sebagai kamufase tindakan ekspropriasi. Namun, hasil penelitian tidak memberikan dukungan empiris atas dugaan tindakan ekpropriasi yang dilakukan pemegang saham pengendali terhadap pemegang saham nonpengendali. Alasan utama hipotesis penelitian tidak didukung secara empiris karena masalah keagenan antara pemegang saham pengendali dan nonpengendali yang rendah di perusahaan bertumbuh, sehingga pemegang saham pengendali tidak tertarik melakukan tindakan ekspropriasi. Dugaan ini dibuktikan dengan nilai *cash flow right leverage* yang relatif kecil.

5.2 Keterbatasan Penelitian

Keterbatasan penelitian ini terletak pada pengambilan sampel yang hanya mempertimbangkan industri manufaktur, sedangkan rantai kepemilikan terjadi lintas industri. Oleh karena itu *cash flow right leverage* mempunyai nilai yang relatif kecil. Hal ini menggambarkan penelitian ini tidak cukup kuat untuk membuktikan konflik keagenan pemegang saham pengendali dan nonpengendali.

5.3 Saran

Penelitian di pasar modal Indonesia yang secara khusus membahas mengenai konflik keagenan antara pemegang saham pengendali dan nonpengendali masih relatif sedikit. Penelitian ini merupakan salah satu penelitian tentang konflik keagenan antara pemegang saham pengendali dan nonpengendali yang diharapkan dapat memberikan ide untuk penelitian di masa yang akan datang. Berkaitan dengan hasil yang didokumentasikan dalam penelitian ini, terdapat beberapa peluang penelitian lanjutan, antara lain :

1. Penelitian yang akan datang dapat memperluas sampel penelitian dengan menggunakan data dari perusahaan secara lintas industri untuk menangkap konflik keagenan yang tinggi antara pemegang saham pengendali dan nonpengendali dan menguji konsistensi hasil temuan dalam penelitian ini.
2. Penelitian yang akan datang dapat menggunakan manfaat privat secara langsung berdasarkan aktivitas ekspropriasi yang terjadi apabila sudah ada dokumentasi tentang transaksi dan kejadian terkait dengan ekspropriasi. Hal ini dilakukan agar pengujian tentang fenomena konflik keagenan antara pemegang saham pengendali dan nonpengendali diharapkan akan lebih kuat.
