## PEGEMBANGAN APLIKASI MULTIMEDIA PENDIDIKAN SAINS PADA REPRODUKSI MANUSIA

### INTISARI

Pada saat ini teknologi informasi berkembang semakin pesat, salah satunya di bidang multimedia. Multimedia adalah sistem komputer yang berkemampuan untuk menampilkan gambar, suara, teks, animasi, dan video. Peran multimedia sebagai media pembelajaran menjadi sangat penting mengingat proses belajar mengajar di Indonesia masih jauh dari memuaskan. Salah satunya adalah pembelajaran organ reproduksi dan proses reproduksi manusia. Sampai saat ini informasi organ reproduksi dan proses reproduksi pada manusia masih didapat dari tampilan buku yang terdiri dari ribuan teks dan gambar yang tidak bergerak sehingga menyulitkan siswa dalam menangkap materi yang diajarkan. Tujuan penelitian ini adalah membuat program multimedia organ reproduksi dan proses reproduksi manusia yang bersifat interaktif. Selain itu, program ini juga dapat dijadikan bahan untuk *sex education* di sekolah-sekolah. Metode yang digunakan untuk pengumpulan data adalah wawancara, studi pustaka, dan hasil *browsing* dari beberapa situs web di internet. Perangkat lunak yang digunakan dalam pengembangan aplikasi ini adalah *Adobe Photoshop CS 2*, *Corel Draw X3* dan *Adobe Flash Player 9.0* sebagai piranti *authoring* yang berfungsi untuk mengkombinasikan teks, suara, video, dan grafik menjadi satu lingkup yang interaktif. Penelitian ini menghasilkan suatu pengembangan program aplikasi organ reproduksi dan proses reproduksi pada manusia berbasis multimedia yang bersifat interaktif.

Kata kunci : Organ reproduksi manusia, proses reproduksi manusia, *sex education*, multimedia.

peripherie. Penitentiary institutions in the United States have been described as "prisons for adults." The term "adult" refers to the fact that most inmates are adults, and it also implies that they are capable of understanding the rules and regulations of the institution. Inmates are expected to follow these rules and regulations, and if they do not, they may be punished. Punishment can take many forms, such as solitary confinement, loss of privileges, or even physical punishment. Inmates are also expected to work, either in the prison or outside the prison walls. They may be assigned to various jobs, such as cooking, cleaning, or repairing equipment. Inmates are also expected to participate in educational programs, such as GED classes or vocational training. These programs are designed to help inmates prepare for life after release from prison. Inmates are also expected to participate in religious services, if they so desire. Religious services are provided by various denominations, such as Protestant, Catholic, and Muslim. Inmates are also expected to participate in group activities, such as sports or clubs. These activities are designed to help inmates socialize and build relationships with other inmates. Inmates are also expected to participate in individual activities, such as reading or writing. These activities are designed to help inmates develop their cognitive skills. Inmates are also expected to participate in mental health services, if they need them. Mental health services are provided by psychiatrists, psychologists, and social workers. These services are designed to help inmates deal with their mental health issues. Inmates are also expected to participate in substance abuse treatment, if they need it. Substance abuse treatment is provided by addiction specialists. These specialists are trained to help inmates deal with their substance abuse issues. Inmates are also expected to participate in anger management, if they need it. Anger management is provided by anger management specialists. These specialists are trained to help inmates deal with their anger issues. Inmates are also expected to participate in sex offender treatment, if they need it. Sex offender treatment is provided by sex offender specialists. These specialists are trained to help inmates deal with their sex offender issues. Inmates are also expected to participate in cognitive-behavioral therapy, if they need it. Cognitive-behavioral therapy is provided by cognitive-behavioral therapists. These therapists are trained to help inmates deal with their cognitive-behavioral issues. Inmates are also expected to participate in family reunification, if they need it. Family reunification is provided by family reunification specialists. These specialists are trained to help inmates deal with their family issues. Inmates are also expected to participate in community reentry, if they need it. Community reentry is provided by community reentry specialists. These specialists are trained to help inmates deal with their community issues. Inmates are also expected to participate in educational programs, such as GED classes or vocational training. These programs are designed to help inmates prepare for life after release from prison. Inmates are also expected to participate in religious services, if they so desire. Religious services are provided by various denominations, such as Protestant, Catholic, and Muslim. Inmates are also expected to participate in group activities, such as sports or clubs. These activities are designed to help inmates socialize and build relationships with other inmates. Inmates are also expected to participate in individual activities, such as reading or writing. These activities are designed to help inmates develop their cognitive skills. Inmates are also expected to participate in mental health services, if they need them. Mental health services are provided by psychiatrists, psychologists, and social workers. These services are designed to help inmates deal with their mental health issues. Inmates are also expected to participate in substance abuse treatment, if they need it. Substance abuse treatment is provided by addiction specialists. These specialists are trained to help inmates deal with their substance abuse issues. Inmates are also expected to participate in anger management, if they need it. Anger management is provided by anger management specialists. These specialists are trained to help inmates deal with their anger issues. Inmates are also expected to participate in sex offender treatment, if they need it. Sex offender treatment is provided by sex offender specialists. These specialists are trained to help inmates deal with their sex offender issues. Inmates are also expected to participate in cognitive-behavioral therapy, if they need it. Cognitive-behavioral therapy is provided by cognitive-behavioral therapists. These therapists are trained to help inmates deal with their cognitive-behavioral issues. Inmates are also expected to participate in family reunification, if they need it. Family reunification is provided by family reunification specialists. These specialists are trained to help inmates deal with their family issues. Inmates are also expected to participate in community reentry, if they need it. Community reentry is provided by community reentry specialists. These specialists are trained to help inmates deal with their community issues.

## **PEGEMBANGAN APLIKASI MULTIMEDIA PENDIDIKAN SAINS PADA REPRODUKSI MANUSIA**

### **ABSTRACT**

At the moment information technology expand fast progressively, one of them in area multimedia. Multimedia is the computer system capable to present the picture, voice, text, animation, and video. Role multimedia as study media become of vital importance remember the process learn the teaching in Indonesia a long way off from gratifying. One of them is study of organ reproduce and process reproduce the human. Till now organ information reproduce and process reproduce at human still got from the book appearance consisting of thousands of text and motion less picture so that complicate the student in catching the taught items. this Research purpose is to making the program multimedia organ reproduce and process reproduce the human having the character of interaktif. Besides, this program also can be made the materials to sex education in sekolah-sekolah. used method for data collecting is interviewing, book study, and result browsing from some situs web in internet. The software used in development of this application is Adobe Photoshop CS 2, Corel Draw X3 and Adobe Flash Player 9.0 as apparatus authoring the functioningness for the combination of text, voice, video, graph become the one scope interaktive. This research yield development of organ application program reproduce and process reproduce at human base on multimedia which have the character of interaktive.

**Keyword :** Organ reproduction the human, process reproduce the human, sex education, multimedia.

## **KATA PENGANTAR**

**Alhamdulillahirabbil’alamin, puji syukur penulis panjatkan kepada Allah SWT atas segala rahmat dan kekuatanNya yang diberikan sehingga penulis dapat menyelesaikan penulisan Tesis yang berjudul “Pengembangan Aplikasi Multimedia Pendidikan Sains Pada Reproduksi Manusia”.**

Tujuan dari penulisan Tesis ini adalah sebagai syarat guna memperoleh gelar Sarjana Strata 2 (S2) di Program Studi Magister Teknik Informatika Universitas Atma Jaya Yogyakarta. Dalam penyusunan Tesis ini, penulis banyak memperoleh bimbingan, bantuan, dorongan serta saran dari berbagai pihak. Penulis menyadari sepenuhnya bahwa tanpa bantuan dari berbagai pihak yang telah membantu, niscaya sulit bagi penulis untuk menyelesaikan Tesis ini. Untuk itu pada kesempatan ini penulis ingin menyampaikan ucapan terima kasih yang tak terhingga kepada :

1. Bapak Prof. Ir. Suyoto, M.Sc., Ph.D. selaku Dosen pembimbing I yang telah banyak meluangkan waktu, arahan dan motivasi kepada penulis.
2. Dra. L. Ernawati, MT selaku Dosen pembimbing II yang telah banyak membantu dan memberikan masukan bagi penulis.
3. Bapak B. Yudi Dwiyanti, ST., MT. selaku Dosen pengujii atas saran dan masukan yang diberikan.
4. Bapak dan ibu tercinta atas doa, dukungan dan bimbingan, yang selama ini diberikan kepada penulis.
5. Kepada kakak-kakakku beserta istri tercinta dan juga kepada keponakanku yang lucu-lucu yang membuat penulis terus mendapatkan semangat untuk menyelesaikan tesis ini.
6. Sahabat dan kekasih jiwaku Eni Suryati yang selalu memberikan motivasi dalam setiap syair puisi yang melantunkan semangat untukku dalam menjalani hidup ini dengan tulus dan ikhlas.

7. Teman-teman kuliah Pasca Sarjana Oscar, John, Juve, Stevan, Pak Hamsah, Mas Danang, Mba Nana, Anes, Ivan, Qido, Jimmy, Mba Yeti, Beny, Raymon, Yuli, Mba Widi terima kasih atas kebersamaannya selama ini.
8. Bapak Zumartono dan keluarga terima kasih atas dukungannya selama ini.
9. Teguh Lukito terima kasih atas bantuan selama ini.
10. Bapak dan Ibu dosen, seluruh staf dan karyawan Program Pasca Sarjana Universitas Atma Jaya Yogyakarta.
11. Semua pihak yang telah banyak membantu dan tidak dapat disebutkan satu persatu.

Penulis menyadari bahwa Tesis ini masih jauh dari sempurna, sehingga penulis mengharapkan kritik dan saran yang membangun untuk perbaikan.

Akhirnya penulis berharap agar Tesis ini dapat memberikan manfaat yang sebesar-besarnya bagi para pembaca dalam memperluas wawasan dan pengetahuan.

Yogyakarta, Desember 2008

Penulis
