

## **BAB V**

### **PENUTUP**

Pada bab ini akan dibahas kesimpulan akhir dari penelitian yang telah dilakukan dan juga dalam bab ini akan diberikan beberapa saran dan masukan yang diharapkan dapat bermanfaat bagi perusahaan-perusahaan domestik serta bagi penelitian selanjutnya.

#### **5.1. Kesimpulan**

Berdasarkan hasil analisis yang telah dilakukan pada BAB IV, maka dapat di ambil beberapa kesimpulan sebagai berikut:

1. Karakteristik responden dalam penelitian ini menunjukkan bahwa 55% responden ialah perempuan dengan 51% berusia antara 17 tahun sampai 20 tahun dan sebesar 34% memiliki uang saku atau pendapatan antara Rp 1.001.000,- sampai dengan Rp 1.500.000,- per bulan.
2. Etnosentrisme konsumen secara langsung berpengaruh signifikan dan positif terhadap niat beli konsumen untuk produk domestik, dengan besar pengaruh sebesar 29,9%. Hal ini dapat diartikan bahwa konsumen yang memiliki kecenderungan etnosentrisme seperti diantaranya adalah kesadaran untuk selalu membeli produk domestik dibandingkan produk impor karena akan membantu mengembangkan perekonomian negara, mendukung karya

anak bangsa, serta mendukung orang Indonesia tetap bekerja, akan lebih memiliki niat beli untuk produk domestik dibandingkan produk impor .

3. Etnosentrisme konsumen berpengaruh signifikan dan positif pada persepsi kualitas produk domestik, dengan pengaruh sebesar 28,5% dan persepsi kualitas produk asing dengan pengaruh sebesar 8% . Hal ini dapat diartikan semakin tinggi etnosentrisme konsumen maka akan semakin tinggi pula persepsi kualitas konsumen terhadap produk lokal dari pada persepsi kualitas untuk produk asing, namun sebaliknya konsumen dengan kecenderungan etnosentrisme rendah akan memandang produk asing lebih baik dibandingkan produk domestik, khususnya produk yang dibuat dari negara-negara yang memiliki citra lebih baik tentang produk tersebut yaitu dari sisi keandalan, pengerjaan, kualitas, konsistensi, dan daya tahan produk.
4. Etnosentrisme konsumen dan persepsi kualitas produk domestik secara bersama-sama maupun secara individual berpengaruh positif dan signifikan pada niat beli produk domestik karena memiliki nilai signifikansi  $\leq 0,05$ . Etnosentrisme konsumen dan persepsi kualitas produk domestik berpengaruh sebesar 41,2% terhadap niat beli konsumen untuk produk domestik. Hal ini dapat diartikan bahwa, apabila etnosentrisme konsumen seperti kesadaran konsumen untuk selalu membeli produk domestik dibandingkan produk impor karena akan membantu mengembangkan perekonomian negara, mendukung karya anak bangsa, serta mendukung orang Indonesia tetap bekerja dan ditambah dengan persepsi kualitas konsumen untuk produk domestik seperti keandalan, pengerjaan, kualitas,

konsistensi, dan daya tahan dari produk domestik meningkat maka akan meningkatkan juga niat beli konsumen untuk produk domestik.

5. Hasil analisis variabel mediasi sesuai dengan pengembangan jenis mediasi yang dilakukan oleh Zhao *et al.*,(2010), menunjukkan bahwa persepsi kualitas terbukti sebagai *complementary mediation* yaitu dilihat dari hasil  $\beta(a) \times \beta(b) \times \beta(c)$  hasilnya adalah positif . Hal ini dapat disimpulkan bahwa persepsi kualitas memiliki peran dalam memediasi secara komplementer hubungan antara etnosentrisme konsumen dan niat beli.

## 5.2. Implikasi Manajerial

Hasil temuan studi yang telah di peroleh tentang pengaruh etnosentrisme konsumen pada niat beli yang di mediasi oleh persepsi kualitas di harapkan dapat bermanfaat bagi pihak - pihak yang berkepentingan, terutama bagi pemasar atau distributor produk *notebook* domestik. Implikasi manajerial dalam penelitian ini adalah sebagai berikut:

1. Persepsi kualitas terbukti secara komplementer memediasi hubungan antara etnosentrisme konsumen dan niat beli konsumen terhadap produk domestik. Hal ini dapat diartikan bahwa etnosentrisme konsumen akan mempengaruhi niat beli konsumen dari persepsi kualitas. Sehingga para pemasar produk *notebook* domestik sebaiknya selalu meningkatkan terhadap kualitas produk secara intensif dan mengikuti perkembangan pasar.
2. Etnosentrisme konsumen memiliki pengaruh secara langsung pada niat beli produk *notebook* domestik. Hal ini tentunya sangat membantu pemasar

*notebook* domestik untuk memasarkan produknya karena konsumen dengan kecenderungan etnosentrisme, lebih memilih produk domestik dalam melakukan keputusan pembelian.

3. Etnosentrisme konsumen secara langsung berpengaruh sebesar 29,9% terhadap niat beli konsumen untuk produk domestik. Perlu adanya dilakukan peningkatan etnosentrisme konsumen Indonesia agar terjadi peningkatan niat beli konsumen untuk produk domestik, oleh karena itu pemasar sebaiknya bekerjasama dengan pemerintah untuk terus mengkampanyekan penggunaan produk produksi dalam negeri sebagai jiwa patriotisme, untuk mendukung pengembangan perekonomian dalam negeri dan kreatifitas anak bangsa dalam berinovasi menciptakan teknologi yang semakin berkualitas, serta mengurangi ketergantungan produk impor.

### **5.3. Keterbatasan Penelitian**

Adapun beberapa keterbatasan yang dimiliki dalam penelitian ini yaitu sebagai berikut :

1. Penelitian ini dilakukan di Sleman, Daerah Istimewa Yogyakarta dengan responden yang digunakan hanya mahasiswa yang aktif di Universitas Atma Jaya Yogyakarta, sehingga mungkin akan terdapat perbedaan hasil penelitian apabila dilakukan didaerah lain.
2. Kategori produk yang digunakan dalam penelitian ini yaitu *notebook* yang merupakan perwakilan dari salah satu produk yang di produksi dalam

negeri. Sehingga mungkin terdapat perbedaan hasil penelitian apabila menggunakan kategori produk yang berbeda.

3. Penelitian ini mengacu pada penelitian sebelumnya Li *et al.*,(2012), tetapi variabel yang di gunakan hanyalah etnosentrisme konnsumen, persepsi kualitas, dan niat beli. Sedangkan variabel *annimosityn* dan *Country of Origin Image*, tidak digunakan dalam penelitian ini.

#### **5.4. Penelitian Kedepan**

Peneliti menyarankan untuk penelitian selanjutnya tentang analisis pengaruh etnosentrisme konsumen pada niat beli konsumen yang di mediasi variabel persepsi kualitas adalah sebagai berikut :

1. Penelitian ini hanya menggunakan variabel independen etnosentrisme konsumen. Hasil penelitian masih menunjukkan adanya variabel lain diluar penelitian ini yang mempengaruhi niat beli konsumen terhadap produk domestik. Untuk itu penelitian selanjutnya dapat menambahkan variabel lain yang dapat memperjelas.
2. Penelitian selanjutnya dapat menggunakan beberapa jenis kategori produk produksi dalam negeri, untuk mengetahui ada tidaknya perbedaan apabila menggunakan produk yang berbeda.
3. Penelitian yang selanjutnya dapat memperbesar sampel dan mencoba di lokasi penelitian yang berbeda untuk perbandingan dan untuk meningkatkan generalisasi penelitian.

Two-way mixed effects model where people effects are random and measures effects are fixed.

- Type C intraclass correlation coefficients using a consistency definition-the between-measure variance is excluded from the denominator variance.
- The estimator is the same, whether the interaction effect is present or not.
- This estimate is computed assuming the interaction effect is absent, because it is not estimable otherwise.

Two-way mixed effects model where people effects are random and measures effects are fixed.

- Type C intraclass correlation coefficients using a consistency definition-the between-measure variance is excluded from the denominator variance.
- The estimator is the same, whether the interaction effect is present or not.
- This estimate is computed assuming the interaction effect is absent, because it is not estimable otherwise
